main indicators of labor market .....	19

## Index of Tables

Total Employed persons by Sex, Nationality and Adopted regulations .....	19
Employees on the job Subject to the rules and regulations of the Civil Service by sex and nationality for 2018 Q2 Compared to 2018 Q1 .....	21
Participants on the job Subject to the rules and regulations of social insurance by sex and nationality for 2018 Q2 compared to Q1 .....	22
Non - Saudi domestic workers by sex for 2018 Q2 Compared to 2018 Q1 .....	22
Total Employed persons for 2018 Q2 Compared to 2018 Q1 .....	22
Total Employed persons by Sex, Nationality and Age group* .....	23
Total Employed persons by Sex, Nationality and Administrative Region* .....	26
Employees on the job Subject to the rules and regulations of the Civil Service by Sex, Nationality and Administrative Region .....	28
Employees on the job Subject to the rules and regulations of the Civil Service by Sex, Nationality and Age group .....	33
Employees on the job Subject to the rules and regulations of the Civil Service by sex, nationality and educational level .....	34
Participants on the job Subject to the rules and regulations of social insurance by sex, nationality and Sector .....	35
Participants on the job Subject to the rules and regulations of social insurance by Sex, Nationality and Administrative Region .....	37
Participants on the job Subject to the rules and regulations of social insurance by Sex, Nationality and Age group .....	38
Participants on the job Subject to the rules and regulations of social insurance by sex, nationality and main groups of occupations .....	39
Participants on the job Subject to the rules and regulations of social insurance by administrative region and main groups of occupations .....	41
Participants on the job Subject to the rules and regulations of social insurance by Age group and main groups of economic activities .....	42
Participants on the job Subject to the rules and regulations of social insurance by sex, nationality and main groups of economic activities .....	43
Participants on the job Subject to the rules and regulations of social insurance by administrative region and main groups of economic activities .....	45
Participants on the job Subject to the rules and regulations of social insurance by Age group and main groups of economic activities .....	46
Total work visas issued by sex and type of sector (visa) .....	47
Total Employment Rate of Population (15 +) by Sex and Nationality .....	47
Saudi Employment Rate (15 +) for 2018 Q2 Compared to 2018 Q1 .....	48
Average Hours of Work for Employed Persons (15 +) by Sex for 2018 Q2 Compared to 2018 Q1 (Hour) .....	49
Average Monthly Wages per Paid employee (15 +) by Sex, Nationality and Type of sector (SR) .....	50
Average Monthly Wages per Paid employee (15 +) by Sex, Nationality and Educational level (SR) .....	51
Average Monthly Wages per Paid employee (15 +) by Sex, and Age Groups Nationality (SR) .....	51
Total Labor force (15 +) by Sex and Nationality .....	53
Saudi (15 +) in the labor force for 2018 Q2 Compared to 2018 Q1 .....	54
Total labor force Persons (15 +) by Sex, Nationality and Age Groups .....	55
Total labor force Persons (15 +) by Sex, Nationality and Educational level .....	56
Total Economic participation rate of Population (15 +) by Sex and Nationality .....	57

Saudi Economic participation rate (15 +) for 2018 Q2 Compared to 2018 Q1 (%).....	58
Saudi Economic participation rate (15 +) by Sex and Age Group (%).....	59
Saudi Economic participation rate (15 +) by Sex and Education level(%).....	60
Saudi Job Seekers for 2018 Q2 Compared to 2018 Q1 (%).....	61
Saudi Job Seekers by Sex and Age Group .....	62
Total Unemployed Persons (15 +) by Sex and Nationality.....	63
Total Unemployed Persons (15 +) for 2018 Q2 Compared to 2018 Q1 .....	63
Total Unemployed Persons (15 +) by Sex, Nationality and Age Groups.....	65
Total Unemployed Persons (15 +) by Sex, Nationality and Educational Level .....	67
Percentage distribution of Unemployed Persons (15 +) Holders of diploma or higher by Sex and Educational Specialization .....	68
Percentage distribution of Saudi Unemployed Persons (15 +) Holders of secondary education or equivalent by Sex and Educational Specialization .....	69
Saudi Unemployed Persons (15 +) by Sex and Previous work experience.....	70
Percentage distribution of Saudi Unemployed Persons (15 +) by Sex and Previous work experience (%).....	70
Percentage distribution of Saudi Unemployed have previously worked (15 +) by Sex and Reasons of Previous Work Leave (%).....	71
Percentage distribution of Saudi Unemployed Persons (15 +) by Sex and Method of job search (%).....	72
Percentage distribution of Saudi Unemployed Persons (15 +) by Sex and Duration of job searching (%) .....	73
Percentage distribution of Saudi Unemployed Persons (15 +) by Sex and Training (%).....	74
Percentage distribution of Saudi Unemployed already trained (15 +) by Sex and Training Type (%).....	74
Percentage distribution of Saudi Unemployed already trained (15 +) by Sex and Financing agency for the training program (%).....	75
Total Unemployment Rate of Population (15 +) by Sex and Nationality (%).....	75
Total Unemployment Rate (15 +) for 2018 Q2 Compared to 2018 Q1 (%).....	77
Total Unemployment Rate (15 +) Sex, Nationality and Age Group (%) .....	78
Total Unemployment Rate (15 +) by Sex, Nationality and Administrative Region.....	80

## Table of Figures

TOTAL EMPLOYED PERSONS FOR 2018 Q2 COMPARED TO 2018 Q1 .....	23
RELATIVE DISTRIBUTION OF TOTAL EMPLOYED PERSONS BY SEX AND NATIONALITY (%).....	24
RELATIVE DISTRIBUTION OF TOTAL EMPLOYED PERSONS BY ADOPTED REGULATIONS (%).....	24
EMPLOYED PERSONS SUBJECT TO THE RULES AND REGULATIONS OF CIVIL SERVICE AND SOCIAL INSURANCE BY SEX AND AGE GROUP ...	25
SAUDI EMPLOYED PERSONS BY ADMINISTRATIVE REGION .....	27
PERCENTAGE DISTRIBUTION OF SAUDI EMPLOYEES ON THE JOB SUBJECT TO THE RULES AND REGULATIONS OF THE CIVIL SERVICE BY EDUCATIONAL LEVEL (%) .....	32
SAUDI PARTICIPANTS ON THE JOB SUBJECT TO THE RULES AND REGULATIONS OF SOCIAL INSURANCE BY MAIN GROUPS OF OCCUPATIONS	36
RELATIVE DISTRIBUTION OF SAUDI PARTICIPANTS ON THE JOB SUBJECT TO THE RULES AND REGULATIONS OF SOCIAL INSURANCE BY MAIN GROUPS OF OCCUPATIONS (%) .....	36
PARTICIPANTS ON THE JOB SUBJECT TO THE RULES AND REGULATIONS OF SOCIAL INSURANCE BY MAIN GROUPS OF ECONOMIC ACTIVITIES	40
REALTIVE DISTRIBUTION OF SAUDI PARTICIPANTS ON THE JOB SUBJECT TO THE RULES AND REGULATIONS OF SOCIAL INSURANCE BY MAIN GROUPS OF ECONOMIC ACTIVITIES (%).....	40
RELATIVE DISTRIBUTION OF NON - SAUDI DOMESTIC WORKERS BY MAIN GROUPS OF HOUSEHOLD OCCUPATIONS.....	44
TOTAL EMPLOYMENT RATE (15 +) IN 10 YEARS (2009 - 2018) .....	46
SAUDI (15 +) IN THE LABOR FORCE FOR 2018 Q2 COMPARED TO 2018 Q1 .....	52
TOTAL LABOR FORCE PERSONS (15 +) IN 10 YEARS (2009 - 2018).....	52
SAUDIS (15 +) IN THE LABOR FORCE BY SEX AND AGE GROUP .....	53
RELATIVE DISTRIBUTION OF SAUDI (15 +) IN THE LABOR FORCE BY EDUCATION LEVEL (%) .....	55
SAUDIS ECONOMIC PARTICIPATION RATE (15 +) FOR 2018 Q2 COMPARED TO 2018 Q 1 .....	56
TOTAL ECONOMIC PARTICIPATION RATE (15 +) IN 10 YEARS (2009- 2018) .....	57
SAUDIS ECONOMIC PARTICIPATION RATE (15 +) BY SEX AND AGE GROUP .....	58
RELATIVE DISTRIBUTION OF SAUDI JOB SEEKERS BY SEX .....	59
SAUDI JOB SEEKERS FOR 2018 Q2 COMPARED TO 2018 Q1 .....	60
SAUDI JOB SEEKERS BY SEX AND AGE GROUP.....	62
RELATIVE DISTRIBUTION OF SAUDI JOB SEEKERS BY EDUCATION LEVEL .....	63
SAUDI UNEMPLOYED PERSONS (15 +) FOR 2018 Q2 COMPARED TO 2018 Q1 .....	64
TOTAL UNEMPLOYED PERSONS (15 +) IN 10 YEARS (2009- 2018) .....	64
SAUDI UNEMPLOYED PERSONS (15 +) BY SEX AND AGE GROUP.....	66
RELATIVE DISTRIBUTION OF SAUDI UNEMPLOYED PERSONS (15 +) BY EDUCATION LEVEL (%) .....	66
RELATIVE DISTRIBUTION OF SAUDI UNEMPLOYED ALREADY TRAINED (15 +) BY SEX AND PREVIOUS WORK EXPERIENCE (%) .....	71
SAUDI UNEMPLOYED PERSONS (15 +) BY DURATION OF JOB SEARCHING (MONTHS) .....	74
RELATIVE DISTRIBUTION OF SAUDI UNEMPLOYED ALREADY TRAINED (15 +) BY TRAINING TYPE (%).....	75
SAUDI UNEMPLOYMENT RATE (15 +) FOR 2018 Q2 COMPARED TO 2018 Q1 (%).....	77
TOTAL UNEMPLOYMENT RATE (15 +) IN 10 YEARS (2009 - 2018) (%) .....	77
SAUDI UNEMPLOYMENT RATE (15 +) BY SEX AND AGE GROUP (%).....	79
SAUDI UNEMPLOYMENT RATE (15 +) BY EDUCATION LEVEL (%) .....	80

## Introduction

GASTAT is pleased to publish the Labor Market Bulletin for the second quarter of 2018 that ends by the end of June 2018.

Seeking to achieve the objectives of the National Strategy for Statistical Development encompassed in the Saudi Vision 2030, The Marker Labor Bulletin provides statistics derived from field surveys conducted by GASTAT on labor force, and from the statistics of the records of entities concerned with labor market (Ministry of Labor and Social Development, Ministry of Civil Service, General Organization for Social Insurance, Human Resources Development Fund, and National Information Center). This includes statistics of workers and job seekers according to various variables, in addition to the main indicators of labor force from the Labor Force Survey such as unemployment rate, economic participation rate, employment rate, and other labor force indicators that rely on different variables like (nationality, gender, administrative region, age groups, and educational level).

The significance of such bulletin is the result of its comprehensive statistics about the Saudi labor market that are issued quarterly in cooperation with the concerned entities. This helps decision makers and researchers in the formulation of labor force policies and contributes to the construction of a database on the labor market in the Kingdom that can be used to prepare and plan future social and economic developmental programs in Saudi Arabia. This also supports the trends and efforts exerted by all governmental entities and the private sector to increase nationalization and provide employment opportunities for young job seekers and women in various sectors.

GASTAT also thanks all partners and clients from the labor market authorities and the heads of households participated in the study. It is worth mentioning that their cooperation, after the guidance of Allah, had a great impact on issuing the bulletin. At the same time, it is hoped that everyone will provide us with proposals via the e-mail ([info@stats.gov.sa](mailto:info@stats.gov.sa)). Such proposals will improve the content of this bulletin and further develop future bulletins.

Allah is the Arbiter of Success,

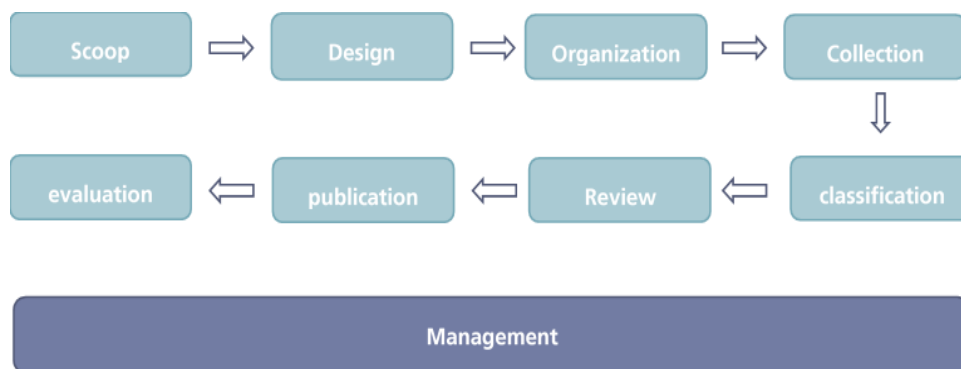

**General Authority for Statistics**

**Labor Force Statistics and Social Affairs**

## Methodology

Based on the mission of GASTAT to Provide comprehensive, reliable, up-to-date statistics and value-added services in line with the international standards and to take the lead in developing a modern statistical sector to support decision making, and in order to achieve its vision to be the most innovative and distinctive statistical reference for Saudi Arabia's socio-economic development, GASTAT has developed all the methodologies of its statistical work in line with the stages of work stipulated in the Manual of the Statistical Procedures of GASTAT which is in line with the procedures adopted by the international organizations related to the development of the statistical methodologies.

The statistical work stages are divided into eight connected stages, in addition to a ninth stage (the comprehensive "management" phase), which is as follows:

### Objectives:

1. Measuring the rates of employment, unemployment, economic participation, and economic dependency from the estimates of Labor Force Survey.
2. Provision of data about the employed individuals according to many variables
3. Provision of data about job seekers according to many variables
4. Provision of data about the unemployed and workforce according to many variables
5. Provision of estimated data about the job-seeking method, unemployment period and work and training experiences of the unemployed.
6. Provision of data about work visas.
7. Provision of data about the average wages and working hours of the employed individuals.

## Time Reference

Data on the Labor Force Survey, in terms of household number of members, demographic, social, and economic characteristics, are referred to:

1. Data of household number of members and demographic characteristics are referred to the date during which the household were visited.
2. Data of employed individuals are referred to the week preceding the household visit (last whole week preceding the visit-from Sunday to Saturday-)
3. Data of unemployed individuals are referred to the four weeks preceding the household visit (last whole four weeks preceding the visit-from Sunday of the first week to Saturday of last week-)
4. Data of training programs enrollment are referred to the twelve weeks preceding the household visit (last twelve weeks preceding the month during which the survey was conducted)

## Survey Sample

### Design of Sampling Plan

1. Designing and documenting the ideal plan for selecting the sample units from which data will be collected, with efficient estimates. For this purpose, the survey community has been divided into non-overlapping parts characterized by relative homogeneity in their units. Each part is a stratum, and each stratum is considered an independent community. A random sample is drawn from each stratum independently, and eventually all withdrawn sampling units are combined to form the total sample.
2. Selecting the sampling units from all statistical frames that are designed to cover the targeted statistical community. The process of sampling is done through two stages: in the first stage, the primary sampling units (enumeration areas) are selected, (1334) out of (36198) enumeration areas are selected and distributed on all the strata of all administrative regions by using a method that is proportional with the size through estimating the number of Saudi households. However, in the second stage, the final sampling units (households) are selected randomly by using the random sampling method with (25) households in each enumeration area; with a total of (33350) households all over Saudi Arabia.
3. Preparing the ideal methodology of sampling units' selection to come up with high-quality outputs, while minimizing the burden on data providers by using the methods of rotation and interference control.
4. Determining the required metadata to apply the statistical frame and to select and allocate the sample.

- Testing, evaluating, and validating the sample, and approving its use in the current duplication of the project.

### Sample Design:

- In the process of collection, the sample is selected as mentioned in the step of " the design of sampling plan", where the selection process is at the level of administrative regions as follows:

Adm. Region	N. of H.	Adm. Region	N. of H.	Adm. Region	N. of H.
I Riyadh	5,175	Asir	2,250	Najran	1,600
Makkah	6,050	Tabuk	1,825	AL - Baha	1,500
Madinah	2,300	Hail	1,625	AL - Jouf	1,650
Qassim	1,650	North.Bord	1,750	Total	33,350
Easte. Prov.	4,200	Jazan	1,775		

- Validating the selected sample and approving its use. This procedure has nothing to do with the processes that rely totally on previous data sources (such as the administrative data) as these processes may create frames from available data.

Following are the most important metadata of the bulletin methodology:

### A. Statistics of Labor Force Survey

Labor Force Survey is one of the household field surveys that are conducted under the field of social statistics. This survey provides estimates and indicators about the relationship between the labor force and population (15 years and above) who live in Saudi Arabia and who are at the work age. Through this survey, economically active and inactive population (inside and outside the labor force) are estimated. Moreover, the most important labor market indicators are measured such as employment, unemployment, and economic participation rates which can only be derived from the Labor Force Survey and the Population and Housing Census.

## Form Design

### Forms of field data collection

The survey form was prepared and designed by labor force survey specialists in the General Authority for Statistics (GASTAT). When designing the form, the international recommendations and standards issued by the International Labor Organization (ILO) in the field of labor force surveys were taken into consideration. The form was presented to the ILO experts during their visit to the Authority, as well as

to the related bodies and the relevant bodies in the labor market to take into account their feedback and observations.

The form is divided into eight sections that included a set of questions for individuals, the most significant of which are:

Principle details of the household members, educational level, work during the previous week, job seekers over the previous four weeks, availability for job during the previous week, and many detailed questions through which labor market indicators are extracted.

### Data Collection Method:

The method of direct contact with the household was used in the process of filling the survey form. Researchers visited households selected for the survey, and directly completed the data using an electronic questionnaire designed for this purpose, including all household members related data.

### Definitions:

#### Survey Sample

The total members of the households selected in the sample, including domestic helpers and the like who live in one house.

#### Household

A person or a group of persons - with or without kinship binding them to one another - who share residence during the enumeration. The household includes:

- 1- Saudi and non-Saudi nationals who usually live with the household but they were absent while the survey was conducted for being temporarily away (abroad or in the kingdom). For example: businessmen, tourists, people who are travel for medication, students on scholarship beyond the borders of the kingdom.
- 2- Individuals who usually live with the household but have been absent while the survey was conducted for taking night shifts, such as guards, physicians, nurses, airport staff and fishers.
- 3- Domestic workers such as servants, drivers and the like who living with the same household

#### Economically Inactive Population (outside labor force)

Population (15 years and above) who are not classified under the labor forces (unemployed) because they do not work, do not seek a job, unable to work, or are not ready to work during the survey reference period. For example: Students, housewives, pensioners who do not work, individuals who are unable to work, individuals who do not want to work and those who do not seek any job for other reasons

## Economically Active Population (inside labor force)

Individuals (15 years and above) who collaborate or even ready to collaborate in the production of commodities and services during the period of the survey time reference. They include the employed and unemployed population.

### Employed Individuals:

People (15 years and above) who did one of the following jobs during the reference period:

- People who have been working for at least one hour for a salary or a wage (in cash or in kind), for example, permanent or temp employees, employers or the self-employed individuals;
- People who provided unpaid assistance for others for at least one hour in any type of business or farm owned by one member of the household;
- People who have been working for at least one hour for others without a wage or a profit (in cash or in kind) as volunteers; or
- were temporarily absent from work all the week due to a leave, and illness or for any other reason and are scheduled to resume work.

The definition also includes students, job seekers, retirees, housewives, etc., who worked during the week preceding the visit for at least one hour, provided that this does not include household work, such as cooking and washing carried out by the housewife, or regular household maintenance work carried out by one of the family members.

### Unemployed Individuals:

They are the individuals (15 years and above) who, during the reference period:

1. They were workless during the week preceding the household visit;
2. They seriously looked for work during the four weeks preceding the household visit (followed at least one method to find a job). Included under this category are those who did not search for work during the four weeks preceding the family visit because of waiting to get work or set up their own business during the coming period, given that they already have searched for work before the fixed time. Bulletin of Labor Market for 1Q/2018 10
3. People who were able to work and ready to join it when available (i.e., ready for work) during the week preceding the household visit.

## Specialization:

### First: Specialization for people holding pre-university diploma degree:

1. Education (Educational Sciences and Teacher Qualification)
2. Humanities and Arts (Humanities includes: Religion, foreign languages, Arabic language and Literature, History, Archeology, Philosophy and Ethics, Arts including: Fine arts, applied arts, music, acting, graphic arts, audio and visual arts, artistic design and handicrafts)
3. Social sciences programs, and Business, and Law (including: Psychology, sociology, cultural studies, politics, economics, press and media, sales and marketing, Financial and banking sciences, insurance, accounting, public administration, business administration, secretary, law).
4. Natural sciences programs, mathematics, computer sciences (including: Biology, chemistry, physics, geology, mathematics and statistics, computer sciences).
5. Engineering, Industries and Construction (including: Mechanical, electrical, electronic, chemical, industrial, civil engineering, manufacturing, construction, and architecture and planning programs)
6. Agriculture and Veterinary Program
7. Health and social services (including: Medicine, nursing, auxiliary medical sciences, pharmacy, rehabilitation and social care for children, juveniles, the handicapped, and social, vocational and family guidance)
8. Services Program (including hotel services, tourism, travel, sports, home services, skin care, beauty care, transport services, and environmental protection programs)

### Second: Specializations of secondary schools or equivalent:

Including science, literature, health, commerce, industry, vocation, agriculture, technical, religions religious sciences, tourism, hotel, sewing and housekeeping programs

### Previously-Trained Unemployed Individuals:

Unemployed individuals (15 years and above) who have taken a training course during the time reference (the last 12 months before the survey)

### The Unemployed Who Have Been Working:

Unemployed individuals (15 years and above) who had been working then left their jobs for any reason, and during the time reference were: unemployed, seriously seeking a job and ready to get one if any available.

### Economic participation rate (according to labor force survey):

An indicator of the participation of population at the age of work (15 years and above) within the workforce as employed or unemployed; it is the ratio of the workforce to the population (15 years and above).

### Employment Rate in the Labor Force Survey:

An indicator of the participation of population at the age of work (15 years and above) within the workforce as employed; it is the ratio of the employed to the workforce.

### Unemployment Rate in the Labor Force Survey:

An indicator of the participation of population at the age of work (15 years and above) within the workforce as unemployed people; it is the ratio of the unemployed people compared to the workforce.

### Weekly worked hours:

An indicator that measures the average actual and ordinary weekly working hours met by the employed population (15 years and above), i.e. total working hours to total employed population.

### Average Monthly Wages per Paid Employee:

An indicator that measures the average salary of the employed persons with paid jobs (15 years and above), i.e. total salary to total employed persons with paid jobs.

### Sector:

A sector is the entity for which the employed person has been working according to the estimates of the labor survey; it is divided into:

1. **Governmental:** All governmental bodies such as, ministries, administrations, agencies, municipalities, schools, universities, institutes, governmental hospitals, military sectors, general authorities (such as GASTAT and the Saudi Food & Drug Authority (SFDA)), governmental banks (such as Saudi Credit Bank and Saudi Arabian Agricultural Bank), as well as development funds. Meanwhile, the capital thereof is owned and supervised by the state such as (Saudi Airlines, Saudi Railways Organization, and Saudi Aramco).
2. **Private Agencies Sector:** Establishments which produce goods or services, have fixed location and legal personality, are owned by one or a group of individuals such as (private companies, malls, private schools and hospitals, as well as commercial banks).
3. **The Self-Employed:** Individuals who provide goods or services personally or in cooperation with a group of outsourced persons, and have no fixed location such as salesmen and self-employed taxi drivers who do not work at private companies.

4. Household sector: Households producing goods or services at homes in return for a salary or profit (in cash or in kind).
5. Non-Profit Organizations Sector: Non-governmental non-profit organizations and authorities which provide the community with goods or services for free or at a nominal price, such as charities and vocational authorities.
6. Domestic Workers Sector: Individuals who provide a household with services for a salary and live with it, such as the female domestic worker, driver, gardener, and building guard.
7. Sector of regional and international organizations and institutions as well as the unclassified sectors

## Calculation of Labor Force Indicators

Indicator	Calculation
<b>Labor Force</b>	(employed individuals+ unemployed individuals)
<b>Unemployment Rate</b>	)unemployed individuals ÷ total labor force × (100
<b>Males' Unemployment Rate</b>	)unemployed males ÷ total male labor force × (100
<b>Females' Unemployment Rate</b>	)unemployed females ÷ total female labor force × (100
<b>Employment Rate</b>	)employed individuals ÷ total labor force × (100
<b>Males' Employment Rate</b>	)employed males ÷ total male labor force × (100
<b>Females' Employment Rate</b>	)employed females ÷ total female labor force × (100
<b>Economic Dependency Rate</b>	)total population – labor force ÷ (labor force × 100
<b>Economic Participation Rate</b>	)total labor force ÷ total population at work age (15+ years) × (100
<b>Males' economic Participation</b>	)total male labor force ÷ total male population at work age (+15 years) × (100
<b>Females' Economic Participation</b>	)total female labor force ÷ total female population at work age (+15 years) × (100

**Note: numbers of employed and unemployed individuals are only estimates from Labor Force Survey**

### B. Labor Market Statistics

Labor market statistics are part of the official statistics whose data are extracted through the administrative records available at governmental agencies in concern with the labor market. These records are major and important sources of data for workers and job seekers in Saudi Arabia. Also, it is important in giving a comprehensive picture of the major components of labor market and for labor market indicators integration.

The administrative records data in the quarterly labor market bulletin- in terms of number of employees, job seekers, and data of visas- are referred to the end of the quarter (last day of last month of the quarter)

### Method of collecting labor market statistics (Administrative records):

Administrative records owned by ministries and government institutions are among the main sources of statistical data used to calculate indicators in various fields. GASTAT has coordinated with the governmental agencies concerned with the labor market to obtain required data including the data of employed individuals and job seekers based on the administrative records data.

### Data Forms Required from Partner Entities

GASTAT derives data from its partner clients electronically through data collection templates/ forms. These forms include basic data about employed individuals, job seekers, and work visas:

- Data form required from the ministry of civil service: this form includes data about workers who currently work and are subject to the civil services regulations according to a number of variables.
- Data form required from the General Organization of Social Insurances: this form includes data of subscribers who currently work and are subject to the social insurances regulations according to a number of variables.
- Data form required from the Ministry of Labor and Social Development: this form includes data of domestic workers and work visas according to a number of variables.
- Data form required from the Human Recourses Development Fund: this form includes data of job seekers who look for jobs through Hafiz program according to a number of variables.
- Data form required from the National Information Center: this form includes data of job seekers who look for jobs through Jadarah and Sa'ed programs according to a number of variables.

## Definitions used in Labor Market Statistics

### Employed Individuals (according to the governmental entities' administrative records)

They are all employees who are employed in accordance with rules and regulations approved by labor market regulators and registered in administrative records. Employees in administrative records can be classified according to the systems and regulations they are subject to, as follows:

- 1) Workers according to civil service systems and regulations from Saudis who work at all government bodies and authorities and general institutions and occupy positions approved in the State budget; they include also (male and female) employees and workers who are subject to the civil pension system, and non-Saudis who sign contracts of such positions according to non-Saudi employment regulations
- 2) Workers according to the social insurance and labor systems and regulations including Saudis and non-Saudis
- 3) Domestic workers: They are the non-Saudi workers of both sexes who work in houses, including (domestic workers, cleaning workers, cooks, stewards, drivers, guards, nurses and house tutors

Note that the data of the workers do not include the following categories:

- 1) Employees at military and security sectors
- 2) Employees unregistered in Social Insurance and Civil Service records including:
  - Saudis working from outside establishments and who are subject to labor regulations and are not registered in social insurance.
  - Saudi employers who work in establishments and are not registered in social insurance systems.
  - Non-Saudi employees working in international, political or foreign military missions.
  - Non-Saudi employees who were allowed into the Kingdom for works that normally do not take more than three months to be completed.

It has to be taken into account that workers' data from the administrative records, according to the global practices of labor market indicators, have several implications for the labor market but are not used statistically to measure employment rates, unemployment rates or economic participation rates.

### Job Seekers (according to the governmental entities' administrative records)

They are Saudi individuals enrolled in job search programs at the Ministry of Civil Service (Jadarah and Sa'ed) and at the Human Resources Development Fund (Hafiz). They register their personal data, qualifications, practical experience and CVs through an electronic system at the application authority.

It worth mentioning that job seekers in administrative records are not subject to the internationally recognized standards and employment conditions approved by the International Labor Organization. Consequently, not everyone is considered unemployed, given that not every job seeker is considered unemployed. In order for the individual to be considered unemployed, he/she must meet the following conditions of unemployment:

1. The individual shall be unemployed on week before.
2. The individual has been looking for work seriously over the past four weeks
3. The individual is able to work and ready to join when available (i.e. ready for work) during one week before.

Taking into account that job seekers' data from the administrative records, according to the global practices of labor market indicators, have several implications for the labor market, but are not used statistically to measure operation rates.

It is worth mentioning that the standards for measuring the numbers of job seekers will be updated in the next Labor Market Bulletin (Quarter 3, 2018). The update is based on a study that covered all applicants of job seeking programs (Jadarah- Sa'ed- Taqat). Applicants are asked to update their data by filling a questionnaire.

### Identifying statistical Classifications:

Classification is a group of organized related categories that are used to collect data according to their similarity. It is considered the base of data collection and publishing in all statistical fields (economic activity, products, expenditures, professions or health ... etc.). classifying data and information will help in setting them in meaningful categories in order to produce useful statistics. Data collection requires accurate order based on their common characteristics to obtain reliable and comparable statistics.

#### First: The national classification of the economic activities:

It is a statistical classification based on ISIC4 which is the reference of the productive activities. This classification was used in the Labor Force Survey to identify the main economic activities of the establishment where an individual works.

Economic activity can be defined as (all the practiced activities or works and services provided by the establishment that make a financial return, sometimes the establishment does not gain any financial return from its works as in charity institutions that rely on donations).

## Second: Saudi classification for professions:

It is a statistical classification which is based on ISCO that provides a system to classify and collect professions' information where they can be obtained by statistical surveys and census.

This classification is used in the Labor Force Survey in order to classify employees based on their professions.

## Third: Saudi classification for majors and education levels:

It is a statistical classification that is based on ISCED which is the reference for organizing educational programs and related qualifications based on the education levels and fields. It covers all the educational programs, levels and methods of learning as well as all the educational stages from kindergarten until higher education. This classification is used in the Labor Force Survey to classify individuals 15 years and above according to their majors and education levels.

## Fourth: National guide for countries and nationalities:

It is an international and unified classification that covers countries and their affiliated territories, it is based on ISO (country code 3166). The classification gives codes to countries and their affiliated territories. Using these codes and numbers instead of the country name is more beneficial for statistical purposes in which it saves time and avoids any errors. The classification is used in the Labor Force Survey to classify Saudi or non-Saudi individuals.

## Validating Collected Data and Following up Data Collectors and Providers

The collected data are validated by reviewing them through the researcher himself, inspector responsible for him and supervisor of the survey in the supervision area. Further, all areas of work are monitored and reviewed by data quality room in the main center of the Authority. The room also controls and monitors the performance of all filed team in concurrence with the implementation time of data collection process from the first day to the last day. The most important tasks of the data quality room are the following:

- Review the collected data and send feedback to field teams at different levels through an automated desktop system that linked with the tablets of researchers, so they can access the feedback quickly in their place work.
- Call households and ask them some questions from the survey to check researcher data integrity and his compliance with instructions when he visited them, obtain the missing data that have not been received yet as well as thank the heads of households for their co-operation.
- Assign a technical team specialized in data quality room to respond to field inquiries either from the employees or heads of households.

- Apply error rules to ensure data consistency, accuracy and logicity.
- Check where the survey was completed by matching its coordinates with the coordinates recorded in the sample file.

### Evaluation:

- The evaluation is conducted by analyzing collected evaluation inputs and comparing the results of this analysis with the results expected previously. Therefore, a number of possible improvements and solutions are identified and discussed with concerned staff in various relevant departments in the Authority, or with their clients of Labor Market Bulletin partners. Further, during this step, clients' performances and satisfaction levels of using Labor Market Bulletin results are measured as well as dissatisfied clients are contacted and provided with clarifications.
- Based on these procedures, the recommendations for obtaining high quality data for the next survey of the Labor Market Bulletin are agreed upon.

### Sources of the Bulletin Data:

The Labor Market Bulletin relied on two main sources:

- **First source:** Estimates of the Labor Force Survey
- **Second source:** Statistics derived from the administrative records of labor market-concerned entities.

The following table shows the data sources of the Labor Market Bulletin 2018, 2nd quarter:

	Data Sources		Type of Source	Data and Indicators of the Source
	GASTAT Labor Force Survey	GASTAT LFS	Field Survey	Estimates of work force, unemployed individuals and the indicators related to work force
	The General Organization for Social Insurance	GOSI	Administrative Records	Employed individuals
	Ministry of Labor and Social Development	MLSD	Administrative Records	Domestiv helpers and Visas
	Ministry of Civil Service	MCS	Administrative Records	Employed individuals and job seekers
	Human Resources development fund	HRDF	Administrative Records	Job seekers
	National Information Center	NIC	Administrative Records	Job seekers
