KEY INDICATORS OF LABOUR MARKET	ERROR! BOOKMARK NOT DEFINED.

Index of Tables

Key indicators of labour market.....	21
Total number of workers by gender, nationality, and followed regulations.....	22
Total number of workers by gender, nationality, and type of sector.....	23
Workers on the job Subject to the rules and regulations of the Civil Service by gender and nationality for 2019 Q1 Compared to 2018 Q4.....	23
Participants on the job Subject to the rules and regulations of social insurance by gender and nationality for 2019 Q1 Compared to 2018 Q4.....	23
Non - Saudi domestic workers by gender for 2019 Q1 Compared to 2018 Q4.....	23
Total Employed individuals for 2019 Q1 Compared to 2018 Q4.....	24
Total workers by gender, nationality, and age group.....	27
Total workers by gender, nationality, and administrative region.....	28
Workes by main group of economic activity, gender, and nationality.....	29
Workers on the job Subject to the rules and regulations of the Civil Service by gender, nationality and administrative region.....	30
Workers on the job Subject to the rules and regulations of the Civil Service by gender, nationality and age groups.....	30
Workers on the job Subject to the rules and regulations of the Civil Service by gender, nationality and educational level.....	31
Percentage distribution of saudis on the job Subject to the rules and regulations of the Civil Service by gender , nationality and educational level.....	31
Workers registered in the records of Civil Service by main economic activity,gender, and nationality.....	32
Participants on the job Subject to the rules and regulations of social insurance by gender , nationality and type of sector.....	33
Participants on the job Subject to the rules and regulations of social insurance by gender ,nationality and administrative region.....	34
Participants on the job Subject to the rules and regulations of social insurance by gender, nationality and age groups.....	34
Participants on the job Subject to the rules and regulations of social insurance by gender, nationality and main groups of occupation..	35
Saudi participants on the job Subject to the rules and regulations of social insurance by main group of occupation.....	36
Participants on the job Subject to the rules and regulations of social insurance by administrative region and main group of occupation	37
Participants on the job Subject to the rules and regulations of social insurance by age groups and main groups of occupation.....	37
Participants on the job Subject to the rules and regulations of social insurance by gender, nationality, and main economic activities groups.....	38

Participants on the job Subject to the rules and regulations of social insurance by main groups of economic activities	39
Participants on the job Subject to the rules and regulations of social insurance by administrative region and main groups of economic activities	40
Participants on the job Subject to the rules and regulations of social insurance by age groups and main groups of economic activities ..	41
Non-saudi domestic workers by gender and main domestic occupations.....	43
Total issued visa by gender and type of sector (visas).....	44
Employment rate of population (15+) by gender and nationality (%).....	44
Employment rate of population (15+) for Q1 2019 compared to Q4 2018	44
Average working hours of workers (15+) by gender for Q1 2019 compared to Q4 2018	45
Average monthly wage of paid workers (15+) by gender and nationality (SAR).....	46
Average monthly wage of paid workers (15+) by gender, nationality, and type of sector (SAR)	46
Average monthly wage of paid workers (15+) by gender, nationality, and educational level (SAR)	47
Average monthly wage of paid workers (15+) by gender, nationality, and age groups (SAR).....	48
Percentage distribution of labour force by gender and nationality (%)	48
Percentage distribution of Saudis (15+) inside labour force for Q1 2019, compared to Q4 2018.....	49
Percentage distribution of labour force by gender, nationality, and age groups (%)	50
Percentage distribution of labour force (15+) by gender and nationality, and educational level (%).....	51
Economic participation rate of population (15+) by gender and nationality	52
Economic participation rate of Saudis (15+) for Q1 2019, compared to Q4 2018	52
Economic participation rate of Saudis (15+) by gender and age groups	54
Economic participation rate of Saudis (15+) by gender and educational level.....	55
Saudi jobseekers by gender	56
Saudi jobseekers for Q1 2019, compared to Q4 2018	57
Saudi jobseekers by gender and age groups.....	58
Saudi jobseekers by gender, nationality, and educational level	59
Percentage distribution of unemployed individuals (15+) by gender and nationality.....	60
Percentage distribution of unemployed individuals (15+) for Q1 2019 compared to Q4 2018 (%).....	61

Percentage distribution of unemployed individuals (15+) by gender, nationality, and age groups.....	62
Percentage distribution of unemployed individuals (15+) by gender, nationality, and educational level	63
Percentage distribution of Unemployed Saudis (15 +) Holding a diploma or higher by gender and educational specialization	64
Percentage distribution of Unemployed Saudis (15 +) Holding a secondary certificate or equivalent by gender and educational specialization	65
Unemployed Saudis (15+) by gender and previous work experience	66
Percentage distribution of unemployed Saudis (15+) by gender and method of jobseeking	68
Percentage distribution of unemployed Saudis (15+) by gender and duration of jobseeking	68
Percentage distribution of unemployed Saudis (15+) by gender and training	69
Percentage distribution of unemployed Saudis (15+) who previously trained by gender and type of training	69
Percentage distribution of unemployed Saudis (15+) who previously trained by gender and financing agency of training program	70
Unemployment rate of population (15+) by gender and nationality.....	71
Unemployment rate of population (15+) for Q1 2019, compared to Q4 2018	71
Unemployment rate of population (15+) by gender, nationality, and age groups.....	72
Unemployment rate of population (15+) by gender, nationality, and educational level	73
Unemployment rate of population (15+) by gender, nationality, and administrative regions	74

Index of Figures

TOTAL NUMBER OF WORKERS FOR Q1 2019, COMPARED TO Q4 2018	24
PERCENTAGE DISTRIBUTION OF TOTAL WORKERS BY GENDER AND NATIONALITY	25
PERCENTAGE DISTRIBUTION OF TOTAL WORKERS BY FOLLOWED REGULATIONS	25
WORKERS SUBJECT TO THE REGULATIONS OF CIVIL SERVICE AND SOCIAL INSURANCES BY GENDER AND AGE GROUPS	26
SAUDI WORKERS BY ADMINISTRATIVE REGIONS	28
PERCENTAGE DISTRIBUTION OF SAUDI SUBSCRIBERS ON THE JOB WHO ARE SUBJECT TO THE REGULATION OF SOCIAL INSURANCES BY MAIN GROUPS OF OCCUPATIONS	36
PERCENTAGE DISTRIBUTION OF NON-SAUDI DOMESTIC WORKERS BY MAIN GROUPS OF OCCUPATIONS	43
EMPLOYMENT RATE OF POPULATION (15+) IN TEN YEARS (2010-2019)	44
PERCENTAGE DISTRIBUTION OF SAUDIS (15+) INSIDE LABOUR FORCE FOR Q1 2019, COMPARED TO Q4 2018	49
PERCENTAGE DISTRIBUTION OF SAUDI LABOUR FORCE (15+) BY GENDER, NATIONALITY, AND AGE GROUPS	50
PERCENTAGE DISTRIBUTION OF SAUDIS (15+) INSIDE LABOUR FORCE BY EDUCATIONAL LEVEL	51
ECONOMIC PARTICIPATION RATE OF SAUDIS (15+) FOR Q1 2019, COMPARED TO Q4 2018	53
ECONOMIC PARTICIPATION RATE OF POPULATION (15+) IN TEN YEARS (2010-2019)	53
ECONOMIC PARTICIPATION RATE OF POPULATION (15+) BY GENDER AND AGE GROUPS	54
PERCENTAGE DISTRIBUTION OF SAUDI JOBSEEKERS BY GENDER	56
SAUDI JOBSEEKERS FOR Q1 2019 COMPARED TO Q4 2018	57
SAUDI JOB SEEKERS BY GENDER AND AGE GROUPS	58
PERCENTAGE DISTRIBUTION OF SAUDI JOBSEEKERS BY EDUCATIONAL LEVEL	60
PERCENTAGE DISTRIBUTION OF UNEMPLIYED SAUDI INDIVIDUALS (15+) FOR Q1 2019, COMPARED TO Q4 2018	61
PERCENTAGE DISTRIBUTION OF UNEMPLIYED SAUDI INDIVIDUALS (15+) BY GENDER AND AGE GROUPS	62
PERCENTAGE DISTRIBUTION OF UNEMPLIYED SAUDI INDIVIDUALS (15+) BY EDUCATIONAL LEVEL	63
PERCENTAGE DISTRIBUTION OF UNEMPLIYED SAUDI INDIVIDUALS (15+) BY PREVIOUS WORK EXPERIENCE	66
PERCENTAGE DISTRIBUTION OF UNEMPLIYED SAUDI INDIVIDUALS (15+) WHO PREVIOUSLY WORKED BY GENDER AND REASONS OF LEAVING PREVIOUS JOB	67
UNEMPLOYED SAUDI INDIVIDUALS BY DURATION OF JOBSEEKING (IN MONTHS)	69
PERCENTAGE DISTRIBUTION OF UNEMPLIYED SAUDI INDIVIDUALS (15+) BY TYPE OF TRAINING	70
UNEMPLOYMENT RATE OF SAUDIS (15+) FOR Q1 2019, COMPARED TO Q4 2018	71
UNEMPLOYMENT RATE OF POPULATION (15+) IN TEN YEARS (2010-2019)	72
UNEMPLOYMENT RATE OF SAUDIS (15+) BY GENDER AND AGE GROUPS	73
UNEMPLOYMENT RATE OF SAUDIS (15+) BY EDUCATIONAL LEVEL	74

Introduction

The Labour Market Bulletin is one of the significant statistical products conducted by GASTAT quarterly. It collects its data from two main sources: first: the field survey (Labour Force Survey), and second: administrative records' data of (Ministry of Labour and Social Development, Ministry of Civil Service, and General Organization of Social Insurances, and Human Resources Development Fund) in addition to the National Information Center. This bulletin, along with the other statistical products of GASTAT, contribute in supporting decision makers and policy planners, including the statistics of workers and jobseekers according to many variables such as nationality, gender, age groups, and educational level. In addition to the main indicators that are extracted from the estimates of Labour Force Survey such as the unemployment rates, economic participation rate, employment rate, and others.

The Labour Market Bulletin is an extension of the Labour Force Survey report, which was launched in 1999 and continued as an annual issue until 2007. It was converted into a semi-annual report, and then became a quarterly report starting from the second quarter 2016. In the fourth quarter of 2016, it has been developed to be a bulletin that collects survey results from the administrative records of concerned entities under the name (Labour Market Bulletin).

This bulletin is important as it provides comprehensive statistics on Saudi labour market . It contributes also in building a statistical database for the labour market that helps in preparing and planning future developmental, social, and economic programs in Saudi Arabia.

GASTAT would like to thank all partners and clients from the labour market entities and the heads of households who participated in the study. It is worth mentioning that their cooperation, after the guidance of Allah, had a great impact on issuing this bulletin. Meanwhile, everyone is welcome to send his/her suggestion and proposals to (info@stats.gov.sa). Such suggestions will improve the content of this bulletin and further develop future bulletins.

General Authority for Statistics

Bulletin Methodology:

1. Data sources of Labour Force Bulletin

Labour market statistics' data are based on two main sources in order to provide comprehensive information on Saudi labour market. They include statistics from the household field survey (Labour Force Survey) which GASTAT conducts quarterly. They also include quarterly data from administrative records of related governmental entities. Therefore, GASTAT can calculate its indicators and release them along with the field survey' indicators within the Labour Market Statistics Bulletin.

1.1. First source: Labour Force Survey

It is a household field survey conducted by GASTAT under the (social statistics) category. Information is collected by visiting a sample of households from all administrative regions of Saudi Arabia. In addition to completing an electronic questionnaire that includes a number of questions. This survey provides estimates and indicators of population' labour force (15 years and above) who live in Saudi Arabia. Moreover, it includes estimates of economically active and inactive population (inside labour force and outside it), and key indicators of labour market such as employment and unemployment rates and others.

1.2. Second source: Administrative records

Recorded and updated data and information of governmental entities that are related to labour market. These data are resulted from the official electronic registration and documentation operations of these entities. Ministry of Labour and Social Development, Ministry of Civil Services, Human Resources Development Fund, General Organization of Social Insurances, and the National Information Center periodically provide GASTAT with their recorded data through the electronic linkage, as these entities are considered key references of workers' data in both the public and private sectors, in addition to the data of job seekers in Saudi Arabia.

The following table shows the type of data provided by each entity from the labour market statistics sources:

Data Source	Entity	Data and Indicators
Household field survey	General Authority for Statistics	Estimates of labour force, unemployed individuals, and indicators of labour force
Administrative records	Ministry of Labour and Social Development	Private sector visas
	Ministry of Civil Service	Government sector' workers and job seekers (JAdara and Sa'ed programs)
	General Organization of Social Insurances	Government and private sectors' workers
	National Information Center	Data of job seekers in the public and private sectors from the data of (Jadara and Sa'ed) in the Ministry of Civil Service at (Taqat) portal of the HRDF, the government sector and individuals' visas, and the numbers of domestic workers.

2. Objectives:

2.1. supporting decision and policy makers, researchers, and those who are interested in getting up-to-date and comprehensive statistics related to the labour market in Saudi Arabia.

2.2. Empowering the government and private sectors to investigate the labour market changes and get use of them.

2.3. Providing the academic sectors with the requirements of social and economic studies and research.

2.4. Providing up-to-date statistics on:

- Unemployment rate according to many variables.
- Unemployed individuals and labour force according to many variables.
- Job seekers according to many variables.
- Workers according to many variables.
- Employment, economic participation, and economic dependency rates.
- Average wages and average working hours.
- Job seeking method, period of unemployment, and previous work and training experiences.

3. Terminologies and Concepts of Labour Market Bulletin

3.1. Terminologies and concepts of Labour Force Survey (First source of Labour Market Statistics)

3.1.1. Survey' statistical framework

Comprehensive manual of all statistical community units. It relies on Census 2010, and has been updated in quarter 1 of 2018.

3.1.2. Survey sample

A selected sample from the statistical framework in order to conduct Labour Force Survey. This sample includes all household members who share the same dwelling including domestic workers and the like.

3.1.3. Household

A person or a group of individuals - with or without kinship binding them to one another - who share residence during the enumeration. The household includes:

1. Saudi and non-Saudi nationals who usually live with the household but they were absent while the survey was conducted for being temporarily away (abroad or in the kingdom). For example: businessmen, tourists, people who are travel for medication, students on scholarship beyond the borders of the kingdom.
2. Individuals who usually live with the household but have been absent while the survey was conducted for taking night shifts, such as guards, physicians, nurses, airport staff and fishers.
3. Domestic workers such as servants, drivers and the like who living with the same household

3.1.4. Head of household

It refers to the person regarded by the household members as its chief member. Usually, s/he is responsible for undertaking the responsibility of the household and his/her age must not be under (15) years old. If the household consists of children and their mother, and they are cared for by a relative who does not live with them, such a relative shall not be deemed as the head of the household, nor shall s/he be recorded as one of its members, since s/he shall be recorded with his/her own household. In this case, the mother shall be deemed as the head of the household.

3.1.5. Main occupation

The main type of occupation practiced by the worker during the reference time

3.1.6. Economic activity

All activities performed or services provided by the establishment in return for consideration. Sometimes, the establishment gets nothing in return, such as charities that are financed by donations.

3.1.7. Economically inactive population (outside the labour force)

Population (15 years and above) who are not classified under the labour forces (unemployed) because they do not work, do not seek a job, unable to work, or are not ready to work during the survey

reference period. For example: Students, housewives, pensioners who do not work, individuals who are unable to work, individuals who do not want to work and those who do not seek any job for other reasons

3.1.8. Economically active population (Labour force)

Individuals (15 years and above) who collaborate or even ready to collaborate in the production of commodities and services during the period of the survey time reference. They include the employed and unemployed population.

3.1.9. Unemployed individuals

They are the individuals (15 years and above) who, during the reference period:

1. They were workless during the week preceding the household visit;
2. They seriously looked for work during the four weeks preceding the household visit (followed at least one method to find a job). Included under this category are those who did not search for work during the four weeks preceding the family visit because of waiting to get work or set up their own business during the coming period, given that they already have searched for work before the fixed time.
3. People who were able to work and ready to join it when available (i.e., ready for work) during the week preceding the household visit.

3.1.10. Previously trained unemployed individuals

Unemployed individuals (15 years and above) who have taken a training course during the time reference (the last 12 months before the survey).

3.1.11. Unemployed individuals who have been working

Unemployed individuals (15 years and above) who had been working then left their jobs for any reason, and during the time reference were: unemployed, seriously seeking a job and ready to get one if any available.

3.1.12. Type of sector: A sector is the entity for which the employed person has been working according to the estimates of the labour survey; it is divided into:

1. **Governmental:** All governmental bodies such as, ministries, administrations, agencies, municipalities, schools, universities, institutes, governmental hospitals, military sectors, general authorities (such as GASTAT and the Saudi Food & Drug Authority (SFDA)), governmental banks (such as Saudi Credit Bank and Saudi Arabian Agricultural Bank), as well as development funds. In addition, it includes the establishments that provide goods or services which their capital is owned and supervised by the state such as (Saudi Airlines, Saudi Railways Organization, and Saudi Aramco).

2. **Private establishments Sector:** Establishments which produce goods or services, have fixed location and legal personality, are owned by one or a group of individuals such as (private companies, malls, private schools and hospitals, as well as commercial banks).
3. **Self- employed individuals:** Individuals who provide goods and services personally or in cooperation with a group of individuals outside the establishment. They do not have a fixed location such as street vendors, and individuals who deliver goods personally as they do not belong to private companies.
4. **Family sector:** Includes productive households who work at home for a wage or (money or in-kind) profit.
5. **Non-Profit Organizations Sector:** Non-governmental non-profit organizations and authorities which provide the community with goods or services for free or at a nominal price, such as charities and vocational authorities.
6. **Domestic Workers Sector:** Individuals who provide a household with services for a salary and live with it, such as the female domestic worker, driver, gardener, and building guard who lives with in the household.
7. **Sector of regional and international organizations and institutions.**
8. **Other unclassified organizations.**

3.1.13. Indicators' definitions:

Indicator	Definition
Economic participation rate	It is an indicator that measures the participation of the working-age population (15 years and over) in the labour force as employed or unemployed individual, which is the ratio of the labour force to the population aged 15 and over.
Employment rate	It is an indicator that measures the participation of the working-age population (15 years and over) in the labour force as employed individuals, which is the ratio of the labour force to employed individuals
Unemployment rate	It is an indicator that measures the participation of the working-age population (15 years and over) in the labour force as unemployed individuals, which is the ratio of the labour force to unemployed individuals
Average weekly working hours	measures the average weekly working hours of workers (15 years and over), which is the total number of working hours to the total number of workers.
Average monthly wage per paid workers	An indicator that measures the average monthly salary of the employed individuals with paid jobs (15 years and above), i.e. total salary to total employed individuals with paid jobs.

GASTAT has relied on the approved formulas of the UN international standards that are compiled with the international labour organization ILO. The indicators are calculated as follows:

Indicator	Calculation formula
Labour force	$=(\text{number of employed individuals} + \text{number of unemployed individuals}) \times 100$
Unemployment rate	$= (\text{number of unemployed individuals} \div \text{total labour force}) \times 100$
Unemployment rate for males	$= (\text{number of unemployed males} \div \text{total labour force of males}) \times 100$
Unemployment rate for females	$= (\text{number of unemployed females} \div \text{total labour force of females}) \times 100$
Employment rate	$= (\text{number of employed individuals} \div \text{total labour force}) \times 100$
Employment rate for males	$= (\text{number of employed males} \div \text{total male labour force}) \times 100$
Employment rate for females	$= (\text{number of employed females} \div \text{total female labour force}) \times 100$
Economic dependency rate	$= \text{Population of dependency age (population below 15 years + population over 65 years and do not work)} \div \text{total population of the age group (15 to 64)} \times 100$
Economic participation rate	$= (\text{total labour force} \div \text{total population of working-age (15 years and over)}) \times 100$
Economic participation rate of males	$= (\text{total male labour force} \div \text{total male population of working-age (15 years and over)}) \times 100$
Economic participation rate of females	$= (\text{total female labour force} \div \text{total female population of working-age (15 years and over)}) \times 100$

Note: number of workers and number of unemployed individuals are only estimated data from the Labour Force Survey

Based on the international standards that Saudi Arabia is committed to, and applied to the G-20 countries:

- Indicators of economic participation rate, employment rate, unemployment rate, average weekly working hours, and average monthly wages of workers are all based on the estimates of (the Labour Force Survey), which is a field survey conducted by GASTAT through visiting households to complete the survey's form
- Data of workers from administrative records have several indicators for labour market, but they are not used statistically to measure employment, unemployment, or economic participation rates
- Commitment to these standards will facilitate international comparisons between countries in labour market indicators

3.2. concepts related to administrative records available at government agencies (Second source of Labour Market statistics):

3.2.1. Workers (based on the administrative records):

All working individuals subjected to approved regulations and laws from the regulatory entities of labour market and are registered in the administrative records. On the other hand, workers can be classified in the administrative records based on the regulations and laws they are subjected to as follows:

- Saudi workers subjected to the laws and regulations of the civil services and working at all governmental institutions and bodies, in other words, workers who hold jobs that are considered within the general budget of the country, also subjected to the civil retirement system (males or females) workers, as well as non-Saudis contractors who fill these positions in accordance the regulations of non-Saudis employment.
- Workers according to the laws and regulations of the social insurance system as well as labour system, which includes Saudis and non-Saudis
- Domestic workers: non-Saudis workers from both genders who work in houses, including servants, cleaners, cooks, waiters, drivers, guards, nurses, and private teachers.

Data of workers in Labour Market statistics which were derived from administrative records do not include the following category:

1. Workers of military and security sectors
2. Workers who are not registered in the civil service and social insurance records, which include:
 - Saudis working for their own businesses and are not subjected to the labour regulations, also, not registered in social insurance, such as: those who work in delivery through electronic apps
 - Saudi employers who work in establishments and not registered in the social insurance
 - Non-Saudi staff working in foreign international, political or military missions
 - Non-Saudi workers who come to the Kingdom for work that normally takes less than three months to be completed.

3.2.2. Job seekers (based on administrative records):

Saudi individuals registered in job searching programs of the Ministry of Civil Service (Jdarah and Saed) as well as Human Resource Development Fund (Taqat). They register their personal data, qualifications, experiences, and CVs through an electronic system. In fact, job seekers in the administrative records do not subject to the internationally recognized unemployment conditions and standards adopted by the International Labour Organization ILO, therefore, they are not unemployed individuals; since not every job seeker is considered unemployed individual. Individuals must meet all the unemployment conditions to be considered as an unemployed individual, which are:

1. The individual must be with no job during the seven days preceding the household visit
2. If the individual was looking for a job during the four weeks preceding the household visit

3. The individual must be able to work and ready to start when the job is available during the seven days preceding the household visit or the next two weeks (i.e. available to start working)

Data of job seekers from the administrative records – based on global practices of labour market indicators – have several indications, but are not used statistically to measure unemployment rates

4. Coverage:

3.1. Spatial coverage:

The labour market statistics covers the statistics related to the labour market across all administrative regions in Saudi Arabia, which are 13 regions. The Labour Force Survey (the first source of the labour market statistics) covers the following regions: (Riyadh, Makkah, Madinah, Qassim, Eastern Region, Asir, Tabuk, Hail, Northern Borders, Jazan, Najran, Al-Baha and Al-Jouf). This is done through the visit of a sample of households from each region, which are chosen by a scientific method in order to be a sample representing the households of the region. However, the administrative records data (the second source of the labour market statistics), include the entire Saudi Arabia's population whose data is documented in the records of relevant government entities.

3.2. Temporal coverage:

The labour force survey data (the first source of the labour market statistics) is based on the number of household members, their demographic, social and economic characteristics, as follows:

- 1) Data on the number of household members and their demographic characteristics is based on the date of the household visit and inspection.
- 2) Data of workers is based on the seven days prior to the household visit and inspection.
- 3) Data of job seekers is based on the four weeks prior to the household visit and inspection, which means the last full four weeks preceding the household visit (from Sunday of the first week to the Saturday of the last week).
- 4) Data of employment availability is based on the seven days prior to the visit, or the following two weeks (the two weeks following the date of the visit, from Sunday of the first week to Saturday of the second week).
- 5) Data of enrollment in training programs is based on the seven days prior to the household visit for young people aged (15-24 years).
- 6) Data on receiving training programs is based on the previous 12 months (the last twelve months prior to the survey month).

The data from administrative records (the second source of the labour market statistics) is based on the last day of the Gregorian quarter of each year.

5. Used statistical classifications:

The bulletin' data depends on the following classifications:

- The National Classification of the Economic Activities:
- Saudi classification of professions
- Saudi classification for majors and educational levels
- National guide for countries and nationalities

6. Sample selection:

The sample is selected by identifying (33.500) households as a chosen sample to represent the survey community at the level of Saudi Arabia, distributed according to the administrative regions as follows:

Administrative region	No. Of households	Administrative region	No. Of households	Administrative region	No. Of households
Riyadh	5,175	Asir	2,250	Najran	1,600
Makkah	6,050	Tabuk	1,825	Al-Baha	1,500
Madinah	2,300	Hail	1,625	Al-Jouf	1,650
Qassim	1,650	Northern Borders	1,750		
Eastern Region	4,200	Jazan	1,775		

Sample units in the Labour Force Survey:

The primary sample unit is the enumeration areas, which are the sample units that were taken in the first stage from the sample design. The (households) are the secondary and final sample units, which are sample units that were taken in the second stage of the sample design, and each secondary sample unit is considered a part of the primary sample unit.

7. Tools of data collection:

- Form of field data collection (first source of Labour Market statistics): the survey's form was prepared and designed by labour force survey specialists in the General Authority for Statistics (GASTAT). When designing the form, the international recommendations and standards issued by the International Labour Organization (ILO) in the field of labour force surveys were taken into consideration. The form was presented to the ILO experts during their visit to the Authority and to the relevant bodies as well to consider their feedback and observations. The questions were formed in a specified and unified way between researchers.

The form was divided into five sections based on the topic to increase its efficiency in achieving the technical specifications of the field work stage

Metadata	Characteristics of household individuals (all household individuals)	Economic data of individuals (15 years and over)	Job search and availability to work (unemployed individuals 15 years and over)	Result of the visit
-----------------	--	--	--	---------------------

The full form can be viewed and downloaded via the official website of GASTAT

https://www.stats.gov.sa/sites/default/files/stmr_lqw_lml_rby.pdf

The form has been transformed into an electronic copy that can be reached through the tablet-based data collection system, which allows:

1. Reviewing the field researcher work zone (survey sample)
2. Reaching to the sample (household) by using the map in the tablet
3. Completing the data by using data auditing and navigation rules (to discover errors of inputs and non-logical inputs when completing the data)
4. Communication between the supervisory categories is through sending and receiving the notes with the field researcher

The administrative records data (the second source of the labour market statistics): GASTAT has completed the data of the labour market automatically from government entities. The data includes the main data of workers, job seekers and work visas, as follows:

1. Data from the Ministry of Civil Service: Including data on workers subjected to Civil Service regulations and policies according to a number of variables.
2. Data from GOSI: Including data related to those who are registered and are working, who are subjected to GOSI's regulations and policies according to a number of variables.
3. Data from the Ministry of Labour and Social Development: Including data of work visas for the private sector.
4. Data from the National Information Center: Including data related to job seekers after data harmonization for those who are registered in (Jadara and Hafiz) in the Ministry of Civil Service with the data of those registered in (Taqat) in HRDF, in addition to data related to work visas for government sector, individuals, and the number of domestic workers.

8. Data collection method:

3.3. Labour Force Survey data collection (the first source of the labour market statistics):

- Candidates working as field researchers, who visited households to collect data (Labour Force Survey), were selected according to a number of practical and objective criteria related to the nature of work.
- All candidates (GASTAT staff and collabourators from some government entities) have been prepared through special training programs.
- Direct contact with the household in the process of completing the survey questionnaire and data collection: Each field researcher visited the households within the sample of the survey after reaching them using the coordinates in the tablet and the guide maps. He also identified himself and presented the official documents proving his statistical identity. In addition, he explained the purpose of his visit and provided an overview of the survey and its objectives. Furthermore, the researcher filled in the electronic questionnaire orally from head of the household. In the absence of the head of the household, the data was collected from any adult member of the household who knows about household affairs.
- All field researchers used tablets to complete survey questionnaire data based on the time reference specified according to the number of household members and their demographic, social and economic characteristics.
- Field researchers in different regions of the Saudi Arabia used the "synchronization" feature available on tablets to upload and transfer the household data directly to the database associated with it at the headquarters of GASTAT, where it is stored in a specific format for review and subsequent processing.
- (Auditing rules) are applied to ensure the consistency, accuracy and logic of the data on the Labour Force Survey questionnaire. This is done through an (electronic bases that detect the discrepancy of answers). These bases were built by linking the logical relationship between the answers of the questionnaire and its variables to help the field researcher to detect any error directly when completing data with the household. These bases will not allow the passing of errors if the answer conflicts with another information or answer in the questionnaire.
- The data collected was verified by reviewing the data through the same field researcher, his inspector and the supervisor on the survey in the supervision area. All the work areas were subjected to a process of monitoring and reviewing from the data quality room at the headquarters of GASTAT. This room also monitors and controls the performance of all working groups in the field in synchronization with the time of the data collection process implementation from the first day to the last day.

3.4. Getting data from administrative records (second source of labour market statistics):

GASTAT has coordinated with the government entities concerned with the labour market to obtain data on labour market statistics. Such data include data of workers, job seekers, and number of visas issued based on data of administrative records. These data are preserved in the databases of the Authority, and are audited and reviewed according to the scientific statistical method and generally quality criteria in coordination with the source of the data.

9. Preparation and revision of results:

After revising the collected data in the previous steps, all outputs are stored and uploaded to the database after being calculated by GASTAT to be reviewed and processed by specialists in Labour Force Statistics through modern technologies and software designed for this purpose.

10. Data publication:

First: Preparation of Results Designed for Publishing:

During this stage, GASTAT downloaded the data's results from the database of labour force surveys. Moreover, it organized and reviewed the data of administrative records included in the Labour Market Statistics Bulletin. Then, the publication tables, Figures of data, indicators, metadata, and methodology were prepared in both languages English and Arabic.

Second: Preparation of Media Kit and Announcement of Publication Date:

The publication date of the bulletin is already set up by GASTAT on its official website at the beginning of the Calendar Year. During this period, the Authority is preparing the media kits to announce the date of releasing the bulletin through media in addition to its various platforms in social networking sites. The bulletin will be published firstly on GASTAT's official website in different formats, such as open data in Excel format to be easily reached for all clients and those who are interested in the labour market in general. It will be uploaded on the website's statistics library as well.

Third: Communication with clients and providing them with the bulletin's results

One of GASTAT's objectives is to better meet its clients' needs, so it immediately provides them with the bulletin's results once the Labour Market Statistics Bulletin is published. It also receives questions and inquiries of the clients about the Bulletin and its results through various communication channels, such as:

- GASTAT's official website www.stats.gov.sa
- GASTAT's official e-mail address info@stats.gov.sa
- Client Support's e-mail address cs@stats.gov.sa
- Official visits to GASTAT's official head office in Riyadh or one of its branches in Saudi Arabia.
- Official letters.
- Statistical telephone (920020081)

11. Applied quality procedures:

Labour market statistics are subject to many technical quality procedures to guarantee the quality of data resulted from this survey. These procedures include:

1. Using the assessment of previous surveys to monitor the strengths and weaknesses in the implementation of the survey and improve the procedures of statistical data collection.
2. Training and testing researchers to guarantee data access in a way that conforms with the survey objectives.
3. Testing the electronic tools used to collect data to make sure that data are safe and protected during all survey stages.
4. Reducing the respondent burden by using the proper statistical methods.
5. Comparing the results of the survey or the administrative records to make sure of their accuracy and how they correspond to reality.
6. Using appropriate filtering methods to avoid individuals duplication in the different administrative records sources.
7. Publishing the results on the dates agreed upon.

In addition to a number of procedures performed in GASTAT data quality room during the data collection' field operations.

Data quality room:

An operations room that synchronously works with the field works of surveys. It is equipped with electronic monitoring tools and tracking screens used by observers and quality specialists to review the consistency of data and to detect errors and extreme values during the data collection process in the field. This is done by immediately following up what is being filled out by the field researcher. However, this Room is responsible for checking the researchers' commitment to the survey's instructions during the visit, and the correctness and logicity of the data. It also ensures implementation of the visitation plan of households or establishments, and reviews some important indicators of the survey to ensure the data accuracy. The main tasks of the Data Quality Room are:

- Reviewing the collected data and sending notes to the field operating teams of different levels through an automated desktop system that is linked with the tablets of the researchers, so they can access the feedback quickly at their working locations.
- Making phone calls with the households in order to ask some questions of the form to check the accuracy of data completed by the researcher, and his commitment to the instructions during the visit. Also, to obtain the missing data that have not been received yet, and to thank the households' heads for their cooperation .
- Answering field inquiries received from field researchers or households' heads .
- Checking the form completion location by matching its coordinates with the registered ones in the sample file.

12. Users and benefits:

All governmental sectors that are associated with the developmental work in Saudi Arabia are benefiting from the Labour Market Bulletin. The labour market group which includes (Ministry of Labour and Social Development, Ministry of Civil Service, and General Organization of Social Insurances, and Human Resources Development Fund, Ministry of Economy and Planning, and a number of organizations in the field of economy and planning are key beneficiaries of the Labour Market Bulletin, in addition to international and regional organizations, researchers, and planners. Data and indicators of labour market are significant statistical products that contribute in supporting decision making in this field. The private sector also benefits from this bulletin to develop the human resources sectors and programs that are related to employment and training, and to follow up with the labour market changes accurately, as the bulletin contains characteristics of workers, unemployed individuals, and job seekers

Workers:

Workers (according to administrative records of government agencies):

The results of the Labour Market Bulletin for the first quarter that ended on March 2019, according to the data of the administrative records of government agencies, showed that the total number of workers reached (12,765,241), where the percentage of males was (82.2%), with (10,494,341) individuals. Whereas, females registered (17.8%) with (2,270,900) individuals.

The results of the administrative records also showed that the total number of Saudi workers reached (3,112,029), the percentage of males was (65.4%) with 2,036,142 individuals, and the percentage of females was (34.6%) with (1,075,887) individuals.

It should be noted that the data of administrative records do not include the following:

- 1) Workers of security and military sectors.
- 2) Workers who are not registered in the records of General Organization for Social Insurance(GOSI), and Ministry of Civil Service (MCS) such as (self-employed workers).

Employment rate (based on the Labour Force Survey's estimates):

Based on the internationally recognized practices, employment rate is calculated by using the estimates of households surveys. On the other hand, results of Labour Market Buletin which is based on the estimates of the Labour Force Survey Q1 (2019) showed that the employment rate of total population (15 years and above) reached (%94.3). The rate among males reached (%97.2) and (%79.0) among females.

معدل التشغيل للسكان (15 سنة فأكثر) حسب الجنس والجنسية (%)

Economically active population: Labour force (based on the estimates of the Labour Force Survey):

According to the internationally approved international practices, labour force can be estimated based on the household surveys and the population and housing census. The results of the Labour Market Bulletin showed that males registered (83.9%) whereas females registered (16.1%) out of total labour force. The survey estimates also showed that the percentage of males recorded (76.2%) and (23.8%) for females out of total Saudi labour force.

Unemployed Individuals (according to Labour Force Survey's estimates)

The unemployed population, according to the internationally recognized practices, are estimated depending on the results of household surveys and general population census. The results of labour market bulletin, based on the estimates of the Labour Force Survey for Q1/2019, showed the total number of the unemployed population who live in Saudi Arabia during the survey conducting process. The male and female individuals accounted for (41.0%) and (59.0%), respectively out of total unemployed individuals. Saudi male individuals recorded (39.9%), while Saudi female individuals made up (60.1%) out of total unemployed Saudis. Regarding non-Saudi individuals, the percentage of male individuals reached (58.7%), whereas female individuals recorded (41.3%) out of total non-Saudi unemployed individuals.
