General Authority for Statistics

Preface

One of the most important responsibilities entrusted to the General Authority for Statistics (GaStat) is to provide a wide range of statistical data and indicators through conducting surveys, researches and statistical studies in the population, social, economic fields. The Authority also coordinates with the government entities to collect and prepare the statistical information related to the activities of those entities and they provide the Authority with it on a regular basis as required by the system of GaStat.

GaStat, represented by the Government Services Statistics Department and the Geographical Statistics Department, have issued a series of Services Guides since the issuance of the Royal Decree No. 3 and / 26301 dated 30/11/1401H which indicate that the General Authority for Statistics (GaStat) has to issue the Services Guide for the cities and villages of the Kingdom of Saudi Arabia to be a unified official reference for all ministries, departments, and governmental institutions.

GaStat is pleased to provide the Services Guide for the cities and villages of the Kingdom of Saudi Arabia, the sixteenth edition, which reflects the data related to the educational, health, administrative, social, security services, judiciary, agricultural, banking, lending funds and public services for the year 1436/1437 H, which is the reference year of this guide. The guide's data shall be a useful reference for all beneficiaries and shall meet the requirements of planners, researchers and those concerned with the distribution of the public and private services at the Kingdom's level.

Metadata for the Services Guide

First: Descriptive introduction for the services guide:

The Royal Decree No. 3 / / 26301 dated 30/11/1401 H indicates that the General Authority for Statistics (GaStat) has to issue a Services Guide for the cities and villages of the Kingdom of Saudi Arabia to be a unified official reference for all ministries, departments, and government institutions. It aims at providing essential data for planners, development policy makers and decision makers. The Authority works on preparing, publishing, and improving this Guide, also it makes the necessary amendments and updates it to meet the new changes, requirements and the actual needs in accordance with the achievement of the Kingdom's Vision 2030 in all sectors from the essential data included in the Guide.

The Guides takes the administrative division of the Kingdom of Saudi Arabia according to the regions system issued by Royal Decree No. 92 / dated 27/8/1412 H (administrative regions, governorates, municipalities) as a general framework for the distribution and classification of data in 4 main groups including (the geographic dimension, general and higher education, health services, public and administrative services) available in the cities and villages of the Kingdom of Saudi Arabia.

The Services Guide for the cities and villages of the Kingdom of Saudi Arabia is the result of the service inventory survey in villages and cities which is one of the field surveys for the government departments that provide the service in the Kingdom of Saudi Arabia. And it is an inventory of all available services in the populated area (cities - villages) distributed by the administrative division of the Kingdom of Saudi Arabia.

Second: Objectives of preparing the services guide:

The services guide in the cities and villages of the Kingdom of Saudi Arabia aims at a number of objectives, most importantly:

1-Providing a database about the most important service establishments at the level of the Kingdom's regions

2-Providing a database about the provided educational services (Education and higher education public and private) at the level of the governorates, municipalities and populated areas in different regions of the Kingdom.

3-Providing a database about the provided health services (hospitals, public primary care centers, ambulances and red crescent centers and private hospitals and clinics) at the level of the governorates, municipalities and populated areas in different regions of the Kingdom.

4-Providing database about the administrative and public services at the level of the governorates, municipalities and populated areas in different regions of the Kingdom.

5- Providing geographical databases and information for each populated area with a certified service and a distance of one kilometer from the administrative unit (emirate, governorate or municipality) which is associated with the populated area, direction and type of road where the populated area and the administrative unit are linked, as well as data about the nearest populated area with educational services or health for the populated areas that do not have any of these services.

Third: Benefits of the services guide:

The importance of issuing the services guide in the cities and villages of the Kingdom is to find a guide that contains data and information unified and officially documented and with high degree of accuracy for all services available in the cities and villages of the Kingdom to be a unified reference for all ministries and government entities and institutions and others. It is also considering as an official document for decision makers in the various sectors in the planning and distribution of services field. A number of government entities are taking the guide as a main and important reference on which they rely on whether in a direct or indirect way to set the future plans for the work and tasks required by them, also to distribute the service facilities in the cities and villages of the Kingdom.

Forth: Periodicity of the services guide:

The first services guide in the cities and villages of the Kingdom of Saudi Arabia was issued in 1402 H, and the guide is issued every three years.

Fifth: Data source for the services guide:

The services guide in the cities and villages of the Kingdom of Saudi Arabia depends on the data and information related to the services from its main sources, represented in the administrative records of the various governmental entities. This data is automatically collected and stored in databases to be processed, monitored, recorded and classified according to the populated area and the administrative subordination.

Sixth: Data reference for the services guide:

The reference year for the data of the services guide (the sixteenth edition) is the financial year of 1436/1437H (2016).

Seventh: Scope of the services guide:

The services guide covers all regions of the Kingdom of Saudi Arabia. And it includes all administrative divisions of these regions from emirates, governorates, municipalities and populated areas.

According to the administrative division of the Kingdom, the administrative region is divided into a number of governorates, the number of which varies from one region to another. The governorate is divided into municipalities. The municipalities are administratively linked to the governorate or the emirate of the region. The emirate, the governorate or the municipality includes a number of populated areas (cities, villages, farms, water resources and desert) which are administratively linked to them.

Serial number	Name of the administrative region	Serial number	Name of the administrative region
1	Riyadh Region	8	Hail Region
2	Makkah Region	9	Northern Boarders Region

General Authority for Statistics

Eightieth: Entities and authorities related to the information and data sources of the services guide:

Data and information included in the services guide reflect a number of services provided by the governmental entities and authorities related to these data in the Kingdom.

- Ministry of Interior
- Ministry of Education
- Ministry of Health
- Ministry of Communications and Information Technology
- Ministry of Justice
- Ministry of Finance
- Ministry of Environment, Water and Agriculture
- Ministry of Commerce and Industry
- Ministry of Culture and Information
- Ministry of Labour
- Ministry of Islamic Affairs, Endowments, Da`wah, and Guidance
- Ministry of Transport
- Ministry of Municipal and Rural Affairs
- General Presidency of the Promotion of Virtue and the Prevention of Vices
- General Sport Authority
- Saudi Industrial Property Authority
- Public Pension Agency
- Saudi Post
- Technical and Vocational Training Corporation
- General Organization for Social Insurance
- Saudi Arabian Monetary Authority
- Social Development Bank
- Agricultural Development Fund
- Real Estate Development Fund
- Saudi Industrial Development Fund
- General Authority of Civil Aviation
- Saudi Commission for Tourism and National Heritage

Ninth: Distribution and classification of data and information within the services guide:

The services guide is issued in thirteen publications, each of which covers data from one of the 13 administrative regions in the Kingdom. The distribution and classification of data and information within each publication is based on the administrative division of the Kingdom issued by the Ministry of the Interior according to the regional system (administrative region- governorate- municipality) which is issued by the Royal Decree No. A / 92 dated 27/8/1412 H, where each guide contains data for each populated area (village- city) according to the subordination of the populated area of the emirate or governorate or municipality. The data are represented in the name of the populated area, geographical data and information, educational and health services, and data related to the availability of the public and administrative services.

Tenth: Contents of the services guide:

The services guide includes multiple and varied data and information related to the available services in the cities and villages of the Kingdom, as follows:

1.An introduction which includes the objective of the services guide, its periodicity and contents.

2.Data at the level of the administrative region which includes the population, main economic indicators according to the economic activity, public service establishments, such as: airports, dams, main roads, hotels, chamber of commerce, industrial cities, productive factories, cities, sports stadiums, youth houses, sport and literary clubs, mosques, Imams (an Islamic leadership position, it is most commonly used as the title of a worship leader of a mosque), Mu'addhin (the person appointed at a mosque to lead and recite the call to prayer) and mosques' servants.

3. Aggregate data at the governorate level which include the total educational, health, agricultural, administrative, social and public services, as well as some educational and health indicators.

4. Aggregate data at the municipalities level which include the total educational, health, agricultural, administrative, social and public services.

5. Geographical data and information which include: name of the populated area and the distance by one kilometer from the administrative unit (emirate, governorate or municipality) which is associated with the populated area, direction and type of road where the populated area and the administrative unit are linked, as well as data about the nearest populated area with educational services or health for the populated areas that do not have any of these services.

6.population number of the governorates and municipalities for each administrative region.

7.Educational services which include: public and private higher education services, public and private education services with its different stages from the kindergarten stage, elementary, intermediate, secondary, schools of Quran memorization, schools of adults' education and literacy. As well as health, agriculture, industrial, technical and commercial educational services, in addition to the institutes and

schools of the special needs education. The number also includes the ownership of buildings of the educational entity (owned/rented) in the general education.

8. Health services which include: hospitals, primary health care centers, private hospitals and clinics. These include the number of doctors and nursing staff (males / females) as well as the number of beds of the hospitals and the services of the Saudi Red Crescent, including the number of paramedics and the number of ambulances.

9.Public and administrative services which include:

a) Number of the administrative services (emirate, governorate, municipalities, traffic, police, passports departments, departments of the civil affairs, centers of the General Presidency of the Promotion of Virtue and Prevention of Vices, secretariats of municipality, office of municipality services, Ministry of transport's branches, branches of water directorate, Ministry of Finance's branches, Public Pension Agency's branches, General Organization for Social Insurance's branches, education's departments and offices (males-females), health affairs directorates, Real Estate Development Fund, Industrial Development Fund, Social Development Fund (AL-Tasleef).

b) Number of the agricultural services (agricultural directorates and branches, Agricultural Development Fund)

c) Number of social and development service (notaries, courts, Ministry of Justice's branches, social security's offices, Civil Defense, social development centers, development committees, charity association, cooperative association).

d) Number of public and finance services (commercial banks, post services, travel and tourism agencies).

e) Public services in terms of availability which include: telecommunication, water and electricity services.

Eleventh: Terms related to the services guide:

- Administrative Region: Part of the Kingdom of Saudi Arabia that is administered by a government body which is directly affiliated with the Ministry of Interior such as Riyadh and Makkah … etc. And each administrative region has a capital city.
- Governorate: Part of the region, the first-level of the subdivisions and reports directly to region, such as Al-Kharj Governorate of Riyadh Region.
- Municipality: The administrative entity that reports to a governorate such as al-Dilam municipality of Al-Kharj Governorate; Others report directly to the emirate headquarter such as Irqah which reports directly to Riyadh.
- Populated area: A static population cluster such as a city, village or a farm, or non-static like cluster around a water source.
- Distance, direction and type of road: distance in kilometers and direction of each populated area, and the type of road leading to the administrative unit that is associated with the Emirate of the administrative region directly, or the governorate or the municipality.

- nearest city or village with education or health: the nearest populated area with educational service for the public education stages, and the closest populated area with health service (primary health care center, public hospital).
- Data of distance, direction and type of road for all the emirates of the administrative regions, related to Riyadh the capital city.
- Doctors by gender (males, females) including dentists, nursing staff (males, females) by gender, and it does not include (the midwife).
- When there is number (0) in the field of male teachers or female teachers in the stages of public education, it means that there are no teachers (male or female) available for full-time teaching at this stage, and the teaching process is held by other teachers who are working other educational stages, and if the number (0) is found in the classrooms' field for the secondary stage (courses system) for males and females, it means that there are lecture halls to rotate students' presence during the day.
- General education includes international education in the populated area.
- The number of administrative and public services includes the number of the branches and offices of the government entities including the separated females' offices that are not within the branches.
- Public services are considered in terms of availability and are not included as a number for the services in the populated area, including (public electricity, public water network, fixed line, mobile phone, internet network).
- Data about the municipalities services within the urban area of cities included within these cities.
- Data about the housing and population for the administrative region, governorates and municipalities based on the General Population and Housing Census 1431 H (2010).

Twelfth: Main results and indicators of the services guide:

- **Distribution of services to different geographical and administrative components:**

The services guide in Cities and Villages provides a clear indication of the distribution of government and private services to all governorates, municipalities and populated area in the Kingdom of Saudi Arabia.

- **Average of the educational services:**

Indicators that measure the average class size and the average number of students per teacher according to each educational stage at the level of governorates or municipalities.

- **Possession's percentage of the educational buildings:**

An indicator that measures the percentage of the educational buildings rented or owned by the educational entities at the municipalities level.

Thirteenth: Equations of measuring the indicators of the educational and health services:

- **Educational services:**

$$\text{Average class size} = \frac{\text{Number of students of the educational stage}}{\text{Number of classes of the educational stage}}$$

$$\text{Average number of students per teacher} = \frac{\text{Number of students of the educational stage}}{\text{Number of teachers of the educational stage}}$$

$$\text{Possession of the educational buildings} = \frac{\text{Number of public schools rented or owned}}{\text{Total number of the public schools}} \times 100$$

$$\text{Average class size per 1000 persons} = \frac{\text{Number of public schools rented or owned}}{\text{Total population number in the governorate or the municipality}} \times 1000$$

- **Health services:**

$$\text{Average bed number per 1000 persons} = \frac{\text{Total number of beds in the hospitals}}{\text{Total population number in the governorate or the municipality}} \times 1000$$

$$\text{Doctors average number per 1000 persons} = \frac{\text{Total number of doctors in the hospitals}}{\text{Total population number in the governorate or the municipality}} \times 1000$$

General Authority for Statistics

Total number of nursing in the hospitals

Nursing average number per 1000 persons = ———————————————————— X   1000

Total population number in the governorate or the municipality

Total number of doctors in care centers and clinics

Doctors average number per 10,000 persons = ———————————————————— X   10,000

Total population number in the governorate or the municipality

Total number of nursing in care centers and clinics

Nursing average number per 10,000 persons = ———————————————————— X   10,000

Total population number in the governorate or the municipality

Fourteenth: Growth rates:

It is possible to review the population growth rates in each Kingdom's region, and can be used with the

population data available in the guide to build the indicators of services at the level of regions or

Administrative region	Annual average population growth rate	Administrative region	Annual average population growth rate
Riyadh region	2.703	Hail region	2.228
Makkah region	2.806	Northern Boarders region	2.171
ALMadina region	2.523	Jazan region	2.235
ALQassem region	2.361	Najran region	2.264
The Eastern region	2.517	ALBaha region	2.152
Aseer region	2.180	ALJuf region	2.267
Tabuk region	2.165	Total	2.563

governorates or municipalities.
