Methodology and quality

The International Trade Statistics are built on administrative records from Zakat, Tax and Customs Authority (non-oil), and the Ministry of Energy (oil). Saudi Arabia's merchandise exports and imports are classified according to the Harmonized Commodity Description and Coding Systems 2022, also known as the Harmonized System (HS), which is maintained by the World Customs Organization (WCO). The HS allows countries to classify traded products in an internationally standardized system of product names and codes. Oil exports refer to exported goods classified in Chapter 27 (mineral fuels, mineral oils, and waxes) of the Harmonized System (HS). Non-oil exports refer to all other goods exported (including petrochemicals). 2024 data is preliminary.
