About GASTAT

The General Authority for Statistics (GASTAT) serves as the only official reference for statistical work in the Kingdom of Saudi Arabia, acting as its technical supervisor & regulator. GASTAT develops a wide range of statistical products across the social, economic, and environmental fields to support policymakers and decision-makers in driving forward the implementation of development plans.

Statistical Knowledge Program

الهيئة العامة للإحصاء
General Authority for Statistics

The Statistical Knowledge Program is a national program launched by the General Authority for Statistics (GASTAT) in partnership with the Ministry of Education. This competition serves as an initiative to support one of its primary objectives: enabling future generations to access accurate information from reliable sources and empowering students to handle data with confidence and professionalism, contributing to the development of an informed society capable of making well-founded decisions.

Objectives

01. Empowering students with advanced skills, including:

Research

Measurement

Comprehension

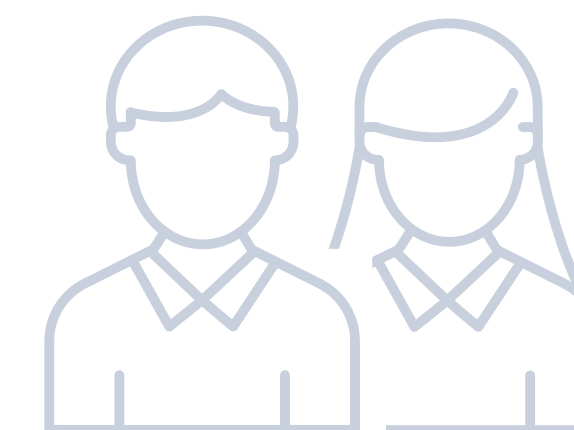

Analysis

02. Introducing students to methods of accessing government data from reliable sources.

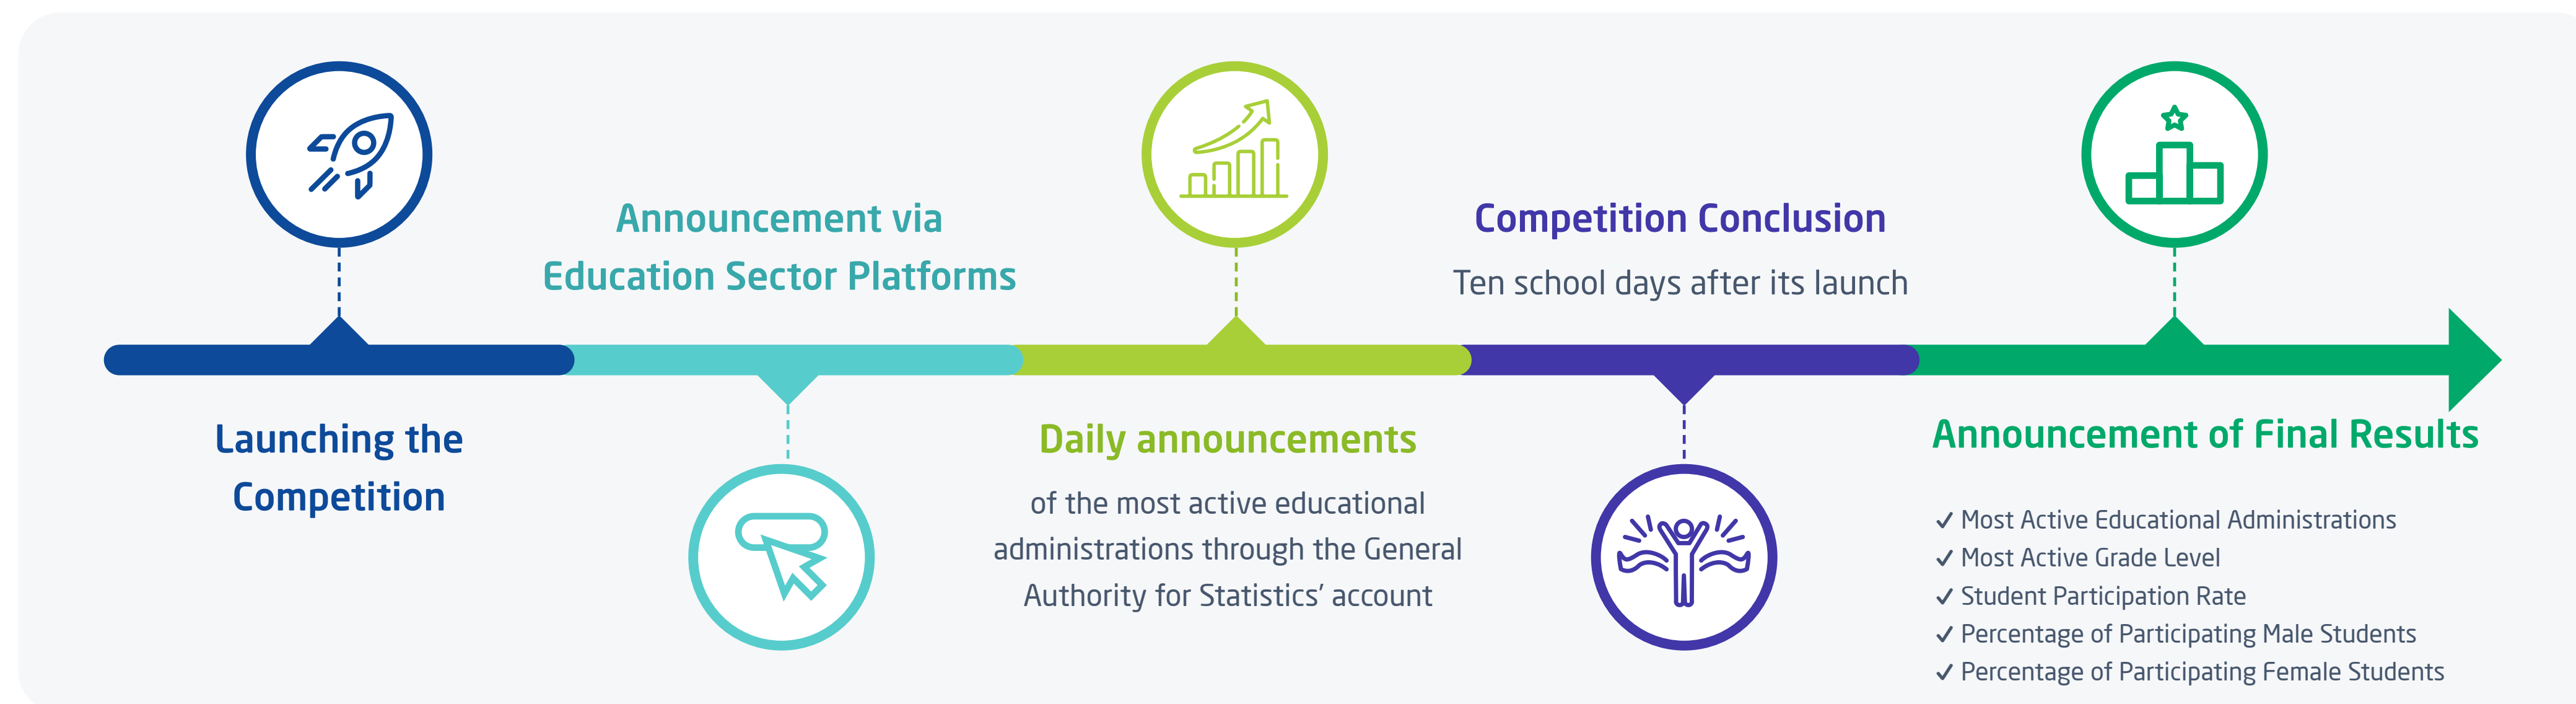

03. Enhancing the efficiency and effectiveness of statistical services.

Target Audience

**General Education
(Intermediate and Secondary Levels)**

Text Content for School Broadcasts for All Grade Levels:

01. The Holy Quran:

Allah says: «and He has encompassed whatever is with them and has enumerated all things in number»

(Surah Al-Jinn, 72:28)

03. Morning Speech:

The General Authority for Statistics (GASTAT) in Saudi Arabia is the official body responsible for statistics. It is the sole official reference for conducting statistical work, serving as its technical supervisor and regulator. Its main roles include collecting data and information covering all aspects of life in the Kingdom from various sources, preparing national statistical indicators and classifications, providing official statistics to public authorities, private institutions, individuals, and international organizations, in addition to promoting statistical awareness to encourage community engagement with statistical work.

02. Definition of Statistics:

Statistics is one of the diverse and important branches of mathematics, applicable in real life. Human societies have valued it since ancient times. It involves data, information, and indicators collected about the conditions and activities of society using scientific methods. This information can be categorized and analyzed to reach results and decisions based on defined alternatives, making it suitable for application and practical use.

04. Did You Know?

- The GDP growth rate in Q2 2025 reached 3.9% according to GDP data.
- The self-sufficiency ratio for dates in 2023 reached 119% according to food security data.
- The real estate price index in Q2 2025 reached 3.2% according to the real estate price index data.
- The annual inflation rate in June 2025 reached 2.3% according to the Consumer Price Index data.
