Number of Photography Shops and Workers 2014-2018

Definitions and concepts

Introduction:

photography is one of the most important cultural indicators locally, regionally, and internationally. GaStat started collecting photography data from their official reference

Description:

it presents the change in the number of photography shops whether for taking photos of people or photocopying. It also clarifies the number of photography workers in the last five years

Data source:

General authority for Statistics

Data periodicity:

1 year

Tables
