

Percentage of Energy (natural gas) Produced from Aggregate Natural Gas Reserve 2010 - 2018

Indicator Description:

Due to the importance of data in the energy sector and the existence of many requirements on statistical data that contribute to the achievement of the vision for the Kingdom 2030, as well as its important to researchers and decision makers. Percentage of energy (natural gas) produced from aggregate natural gas reserve indicator is considering as one of the most important indicators of energy security, Safe and adequate energy resources for domestic consumption and foreign trade.

Index collection method:

Percentage of energy (natural gas) produced from aggregate natural gas reserve indicator is depending on indicators from administrative records. Data are collected from the producer of the data such as the Ministry of Energy, Industry and Mineral Resources and the Electricity and Co-Generation Regulatory Authority.

Indicator Calculation Method:

The indicator is calculated through this formula:

- Percentage of natural gas production = $\frac{\text{Amount of natural gas extracted}}{\text{Aggregate natural gas reserve}} * 100$
- If the unit of the indicator components are different, conversion factors are used

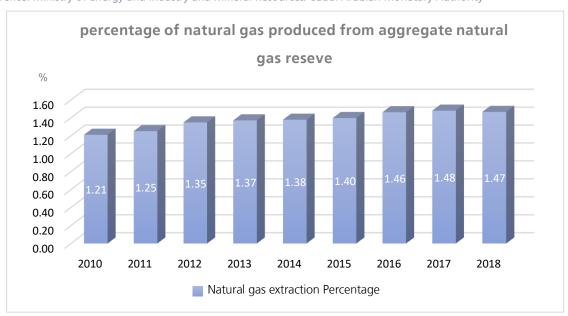

Table & Chart:

percentage of energy (natural gas) produced from aggregate natural gas reserve
