## Introduction

By virtue of Royal Decree No. 23, dated 7/12/1379H, the Central Department of Statistics & Information (today known as GStat) has become entitled to collect economic, social and housing data in the Kingdom to be published periodically. Acting under this right, the authority has developed statistical research programs to boost its economic database.

One of the programs that GStat is entrusted with is the economic surveys program, on top of which comes the Annual Economic Establishments Survey; that is considered one of the most important economic surveys carried out by GStat. The main objectives of this program include provision of statistical data on the establishments that practice various economic activities. The data cover number of workers, their remunerations, expenditure and revenues, as well as capital formation.

The Annual Economic Establishments Survey is a link in chain of surveys which are being implemented at intervals in accordance with the economic frameworks (economic censuses), over the period 2010-2014.

It is the second annual economic survey that covers the same sample of establishments which was chosen in context of the establishment Census 2010 to provide an integrated framework of specialized economic researches. Listed in this census were all

establishments practicing every economic activity all over the kingdom.

The sample included 33,000 establishments that were scientifically selected to represent every Saudi administrative region and were classified according to the International Standard Industrial Classification of All Economic Activities (ISIC).

On this occasion, GStat extends special thanks and profound gratitude to all those who contributed to the completion of this project, particularly the establishments included in the sample of this survey for their cooperation in providing the required data.

As the GStat aspires that the results of this survey would contribute to enhancing the statistical economic database, it welcomes all suggestions that may improve this survey.

Allah is the Arbiter of Success,,,

## Survey Objectives

- ◀◀ To provide detailed data on all economic activities to develop indicators in a manner helping identify growth rates of each economic activity;
- ◀◀ To provide institutional sectors with economic data to develop economic indicators in a manner helping identify growth rates of these sectors;
- ◀◀ To measure participation of every economic activity in the growth process;
- ◀◀ To recognize the relative importance of every economic activity and sector:
- ◀◀ To update economic data of each economic activity;
- ◀◀ To study national income resource diversification, and provide the necessary data for preparing and compiling the national accounts;
- ◀◀ To have indications on how many workers are involved in each economic activity;
- ◀◀ To identify the change volume in remunerations paid to workers according to the economic activity;
- ◀◀ To estimate volume of change in the annual accretion of capital (capital formation) by economic activity;
- ◀◀ To calculate the added value and return of investment by economic activity;

- ◀◀ To provide the needed statistical data and information on all economic activities for government bodies and authorities as well as researchers; and
- ◀◀ To use such data to make local, regional and international comparisons and carry out studies and analyses.

## Method of the Economic Establishments Survey

### Data collection method:

The collection of survey data was carried out through face-to-face interviews by qualified and well-trained researchers under the direct supervision of the General Authority for Statistics (GASat) employees to cover every region and city of the Kingdom.

The GASat has depended on this methodology to update its economic database with precise information and details according to the economic establishments' statistics principles.

### Scope and range:

The survey examines all public and private sectors for-profit establishments working in KSA in 1433 AH (2012).

### Sample framework:

Data provided by the GASat in its establishment censuses in 2010 were used as a framework for all field economic surveys that carried out using the sampling methods under the authority's field plan.

The Establishment Census 2010 covered all economic activities in every Saudi administrative region (13).

### Sample structure for Annual Economic Establishments Survey:

In light of the Establishment Census (sample framework), a statistical unit is defined in this survey as an establishment, individual facility, central headquarter or branch that has its own data, i.e. the sample framework consists of every individual entities, headquarters and

branches of the establishments which have independent financial account. This definition is developed according to the general international application of the field economic studies.

In accordance with the results the administrative province (13 regions) at ISIC level two (as per the national accounts), the administrative divisions and economic activities shall be counted constant and main factor of the stratified sampling process.

For the most precise results, the establishments were classified according to the labor size into three categories:

- « Establishments that employ 1-9 workers
- « Establishments that employ 10-49 workers
- « Establishments that employ more than 50 workers

Accordingly, the survey sample was selected under the following conditions:

1. Covering all establishments operating within the scope of the survey which hire at least 50 workers by certain probability (an integer).
2. Using a stratified multi-stage sampling methodology, as well as the probability method that is proportionate with the workers in the establishments that hire less than 50 workers by the economic activity practiced to select a sample that represents such category.

#### **Geographic scope:**

It means the thoroughness of collected data that involve every establishment in the sample in every city covered by the study including all administrative regions represented by the central directorates and main cities.

The stratified random sampling method was applied in this study. Samples were taken over stages under the general framework of the establishment census 2010 after preparation of main lists.

At the first stage, up to 13 cities were chosen as confirmed cases due to their economic importance where their were different administrative headquarters.

At the second stage, the other cities (43) were named as random sample at the level of every administrative region (43 cities) to represent all populated localities when establishments are classified by city and size of labor employed under the ISIC.

### **Form of the Annual Economic Establishments Survey:**

A form was prepared for all economic activities to cover the most important economic changes taking place in the subject economic activity in light of the study objectives and requirements in addition to the applied analysis techniques, nature of statistical unit and the fulfillment of needs to collect data for the national accounts that fit establishments working in the Kingdom.

For the mentioned objectives, the following criteria shall be met by the form:

The collected data shall be reflected on the establishment's main economic activity.

Forms shall fit all establishments chosen from the census according to workers class size so that the source of data can give answers for every question whatever the size of the establishment.

## Glossary

Some statistical concepts and terms are commonly used by the GASStat to carry out its researches including the administrative region, city, alley and sector. These terms are set to be used in all statistical processes, while there are many other terms that are specific for economic surveys in addition to terms that are only used for the specialized research operations.

Economic survey terms:

### **Establishment:**

An establishment is an economic entity with legal personality. It has a fixed location and carries out a certain economic activity. It is owned by one or a group of individuals, company or a semi-government sector. The establishment is the smallest economic unit that may have data on workers, their remunerations, expenditure, income and capital formations, etc.

### **Economic Activity:**

It is every business activity or service provided by the establishment in return of specific revenues. Sometimes, the establishment, such as donation-financed charities, gets nothing in return.

Establishment economic activity classification is based on ISIC Rev.4. (International Standard Industrial Classification of All Economic Activities, Rev.4)

### **Workers:**

All individuals, Saudis and foreigners, who already work for the establishment with or without pay, as well as the owners, their family members and employees, whether they are full-timers or part-timers, permanently or temporarily employed, males or females, whether they are paid on a daily, weekly or monthly basis. They include partners and members of joint-stock companies, board chairmen and members, as well as workers on paid vacations.

**Wages and salaries:**

Cash payments and fixed allowances that are regularly paid by the establishment to workers in return for regular working time.

**Benefits and allowances:**

Other cash and in-kind payments that are made to the workers than the salaries and wages including all sorts of bonuses and benefits, such as scholarships, education payments for the worker or his/her dependents, food and housing allowances, social security fees, transport allowances and overtime.

**Worker remunerations:**

Wages and salaries as well as additional benefits and allowances.

**Other expenses:**

This includes all other expenses that were paid by the establishment for goods and services over the year as a result of carrying out its economic activity, whether purchased in the same year or taken off storehouses in previous years, in addition to the amounts payable by

the establishment in the same year in connection with the same activity and not related to the necessary goods supplies and services.

📄 **Expenditure:**

The gross value of payments made as compensation for the workers plus other expenses.

13

**Revenues:**

the cash revenues gained as a result of the activity practiced by the establishment. They also include the daily revenues received for the operation as well as the revenues due to be collected as an investment revenue and the likes.

**Operating surplus:**

is the revenues less expenses.

**Fixed assets purchased in a year:**

they are the capital formation as a property in possession of the establishment which were purchased in the course of the year to achieve its objectives and not meant to be sold or used as a raw material for the production process such as the residential and nonresidential property, land, means of transportation, tools, equipment and furniture.

## Guide of the economic activities - double classification

Structure of the International Standard Industrial Classification (ISIC rev.4) according to the double classification of activities in the following table:

Economic Activity	Depart	Description of the activity
Agriculture and Forestry and Fishing	01	Agriculture and animal production, hunting and related
	02	Forestry and logging
	03	Fishing and aquaculture
Mining and quarrying	05	Mining of coal and lignite
	06	Extraction of crude petroleum and natural gas
	07	Mining of metal ores
	08	Other mining and quarrying activities
	09	Mining support services
Manufacturing	10	Manufacture of food products
	11	Manufacture of beverages
	12	Manufacture of tobacco products
	13	Manufacture of textiles
	14	Manufacture of wearing apparel
	15	Manufacture of leather and related products
	16	Manufacture of wood, its products and cork
	17	Manufacture of paper and paper products
	18	Printing and reproduction of registered media materials
	19	Manufacture of coke and refined petroleum products
	20	Manufacture of chemicals and chemical products
	21	Manufacture of pharmaceuticals and basic pharmaceutical
	22	Manufacture of rubber and plastics products
	23	Manufacture of non-metallic products
24	Manufacture of basic metals	
25	Manufacture of fabricated metal products, except	
26	Manufacture of computer, electronic and optical products	
27	Manufacture of electrical devices	

		28	Manufacture of equipment and not elsewhere classified
--	--	----	---

Economic Activity		Depart	Description of the activity
		29	Manufacture of motor vehicles
		30	Manufacture of other transport equipment
		31	Furniture Making
		32	Other manufacturing industries
		33	Repair and installation of machinery and equipment
D	Electricity and gas supply	35	Electricity, gas, steam and air conditioning
E.	Waste supply, sewer system activities; waste collecting and treatment	36	Water collection, treatment and supply
		37	Sewage
		38	Waste collection, treatment & disposal activities; materials
		39	Remediation activities and other waste management
F	Construction	41	Construction of buildings
