Economic Establishments Survey

### Introduction

By virtue of Royal Decree No. 23, dated 7/12/1379H, the Central Department of Statistics & Information (Today known as GAStat) has ecome entitled to collect economic, social and housing data in the lingdom to be published periodically. Acting under this right, the uthority has developed statistical research programs to boost its conomic database.

One of the programs that GAStat is entrusted with is the economic urveys program, on top of which comes the Annual Economic stablishments Survey; that is considered one of the most important conomic surveys carried out by GAStat. The main objectives of this rogram include provision of statistical data on the establishments nat practice various economic activities. The data cover number of corkers, their remunerations, expenditure and revenues, as well as apital formation.

The Annual Economic Establishments Survey is a link in chain of urveys which were implemented at intervals in accordance with the conomic frameworks (economic censuses), over the period 2010 – 014.

It is the second annual economic survey that covers the same ample of establishments which was chosen in context of the stablishment Census 2010 to provide an integrated framework of pecialized economic researches. Listed in this census were all establishments practicing every economic activity all over the kingdom.

The sample included 33,000 establishments that were scientifically selected to represent every Saudi administrative region and were classified according to the International Standard Industrial Classification of All Economic Activities (ISIC).

6

On this occasion, GAStat extents special thanks and profound ratitude to all those who contributed to the completion of this project, articularly the establishments included in the sample of this survey or their cooperation in providing the required data.

As the GAStat aspires that the results of this survey would ontribute to enhancing the statistical economic database, it relcomes all suggestions that may improve this survey.

Allah is the Arbiter of Success,,,

The General Authority for Statistics (GAStat) - previously known as the Central Department of Statistics & Information Production Sectors Statistics P.O. Box: 3735 Riyadh 11481 info@cds.gov.sa

### Survey objectives

- To provide detailed data on all economic activities to develop indicators in a manner helping identify growth rates of each economic activity;
- To provide institutional sectors with economic data to develop economic indicators in a manner helping identify growth rates of these sectors;
- To measure participation of every economic activity in the growth process;
- To recognize the relative importance of every economic activity and sector:
- To update economic data of each economic activity;
- To study national income resource diversification, and provide the necessary data for preparing and compiling the national accounts;
- To have indications on how many workers are involved in each economic activity;
- To identify the change volume in remunerations paid to workers according to the economic activity;
- To estimate volume of change in the annual accretion of capital
   (capital formation) by economic activity;
- To calculate the added value and return of investment by economic activity;

- To provide the needed statistical data and information on all economic activities for government bodies and authorities as well as researchers; and
- To use such data to make local, regional and international comparisons and carry out studies and analyses.

### Method of the Economic Establishments Survey

### ata collection method:

The collection of survey data was carried out through face-to-face terviews by qualified and well-trained researchers under the direct upervision of the General Authority for Statistics (GAStat) employees cover every region and city of the Kingdom.

The GAStat has depended on this methodology to update its conomic database with precise information and details according to ne economic establishments' statistics principles.

### cope and range:

The survey examines all public and private sectors for-profit stablishments working in KSA in 1434 AH (2013).

### ample framework:

Data provided by the GAStat in its establishment censuses in 2010 vere used as a framework for all field economic surveys that carried ut using the sampling methods under the authority's field plan.

he Establishment Census 2010 covered all economic activities in very Saudi administrative region (13).

### ample structure for Annual Economic Establishments Survey:

In light of the Establishment Census (sample framework), a statistical nit is defined in this survey as an establishment, individual facility, entral headquarter or branch that has its own data, i.e. the sample amework consists of every individual entities, headquarters and branches of the establishments which have independent financial account. This definition is developed according to the general

nternational application of the field economic studies.

In accordance with the results the administrative province (13 egions) at ISIC level two (as per the national accounts), the dministrative divisions and economic activities shall be counted as onstant and main factor of the stratified sampling process.

For the most precise results, the establishments were classified coording to the labor size into three categories:

Establishments that employ 1-9 workers

Establishments that employ 10-49 workers

Establishments that employ +50 workers

Accordingly, the survey sample was selected under the following onditions:

- . Covering all establishments operating within the scope of the survey which hire at least 50 workers by certain probability (an integer).
- 2. Using a stratified multi-stage sampling methodology, as well as the probability method that is proportionate with the workers in the establishments that hire less than 50 workers by the economic activity practiced to select a sample that represents such category.

### Geographic scope:

It means the thoroughness of collected data that involve every stablishment in the sample in every city covered by the study including all administrative regions represented by the central directorates and main cities.

The stratified random sampling method was applied in this study. Samples were taken over stages under the general framework of the establishment census 2010 after preparation of main lists.

At the first stage, up to 13 cities were chosen as confirmed cases due

to their economic importance where there were different administrative dquarters.

the second stage, the other cities were named as random sample at level of every administrative region (43 cities) to represent all ulated localities when establishments are classified by city and size bor employed under the ISIC.

### m of the Annual Economic Establishments Survey:

form was prepared for all economic activities to cover the most ortant economic changes taking place in the subject economic vity in light of the study objectives and requirements in addition to the lied analysis techniques, nature of statistical unit and the fulfillment eeds to collect data for the national accounts that fit establishments king in the Kingdom.

or the mentioned objectives, the following criteria shall be met by the

The collected data shall be reflected on the establishment's main economic activity.

Forms shall fit all establishments chosen from the census according to workers class size so that the source of data can give answers for every question whatever the size of the establishment.

### **Glossary of Terms**

ome statistical concepts and terms are commonly used by the GAStat to arry out its researches including the administrative region, city, alley and ector. These terms are set to be used in all statistical processes, while here are many other terms that are specific for economic surveys in ddition to terms that are only used for the specialized research perations.

conomic survey terms:

### Establishment:

is an economic entity with legal personality. It has a fixed location nd carries out a certain economic activity. It is owned by one or a roup of individuals, company or a semi-government sector. The stablishment is the smallest economic unit that may have data on orkers, their remunerations, expenditure, income and capital prmations, etc.

### **Economic Activity:**

is every business activity or service provided by the establishment in eturn of specific revenues. Sometimes, the establishment, such as onation-financed charities, gets nothing in return.

stablishment economic activity classification is based on ISIC Rev.4. nternational Standard Industrial Classification of All Economic ctivities, Rev.4)

Workers:

All individuals, Saudis and foreigners, who already work for the establishment with or without pay, as well as the owners, their family

members and employees, whether they are full-timers or part-timers, ermanently or temporarily employed, males or females, whether they re paid on a daily, weekly or monthly basis. They include partners and rembers of joint-stock companies, board chairmen and members, as rell as workers on paid vacations.

### Wages and salaries:

ash payments and fixed allowances that are regularly paid by the stablishment to workers in return for regular working time.

### **Benefits and allowances:**

ther cash and in-kind payments that are made to the workers than re salaries and wages including all sorts of bonuses and benefits, such s scholarships, education payments for the worker or his/her ependents, food and housing allowances, social security fees, ansport allowances and overtime.

### Worker remunerations:

ages and salaries as well as additional benefits and allowances.

### **Other expenses:**

his includes all other expenses that were paid by the establishment or goods and services over the year as a result of carrying out its conomic activity, whether purchased in the same year or taken off orehouses in previous years, in addition to the amounts payable by the establishment in the same year in connection with the same activity and not related to the necessary goods supplies and services.

### **Expenditure:**

The gross value of payments made as compensation for the workers

### Revenues:

ne cash revenues gained as a result of the activity practiced by the stablishment. They also include the daily revenues received for the peration as well as the revenues due to be collected as an investment evenue and the likes.

### **Operating surplus:**

is the revenues less expenses.

### Fixed assets purchased in a year:

ney are the capital formation as a property in possession of the stablishment which were purchased in the course of the year to thieve its objectives and not meant to be sold or used as a raw aterial for the production process such as the residential and onresidential property, land, means of transportation, tools, puipment and furniture.

**Guide of the economic activities - double classification** tructure of the International Standard Industrial Classification (ISIC ev.4) according to the double classification of activities in the of owing table:
